

ANNUAL REPORT

20
19

A man wearing a brown hat and a plaid shirt is walking away from the camera through a field. The scene is bathed in the warm, golden light of a sunset or sunrise. In the background, there are trees and a fence. The overall mood is peaceful and rural.

OUR CORE PURPOSE

To assist farmers, growers, and harvesters of forestry and aquatic products, agribusinesses, and rural residents in achieving success.

OUR CORE VALUES

- We nurture customer relationships.
- We strive to exceed our customers' expectations with superior products and services.
- We provide courteous and prompt assistance.
- We are honest and fair with everyone.
- We are good corporate citizens.
- We achieve success through teamwork.
- We price our products and services equitably based on cost, risk, and competition.
- We return as much of our profits as possible in patronage refunds.

"I am passionate about conservation and hope to have a part in making the world a better place for future generations. I am immensely thankful to the Colonial Agricultural Educational Foundation for playing a role in helping me to achieve my career goals and dreams!"

Colonial Agricultural Educational Foundation

The Colonial Agricultural Educational Foundation's mission is to provide financial support for higher education which will enable deserving students to grow, prosper, and contribute to their communities. Scholarships are awarded to students who are furthering their education through attendance at a college, university, vocational, or trade school and who exhibit an aptitude for learning and a desire for self-improvement through education. Since 1991, the Foundation has awarded \$2,500,000 in scholarships. There are currently more than 80 scholarships available ranging from \$2,000 to \$6,500!

Charles Sasscer

"It has been an honor to receive multiple scholarships from the Colonial Agricultural Educational Foundation during my secondary education career. I hope to bridge the gap between the agriculture industry and the public in order to teach them about sustainable beef cattle production practices."

Pictured with relationship manager Ron Jameson (right)

Applications are accepted every year starting November 1 and are due by March 1 of the following year. The application can be found on our website (www.colonialfarmcredit.com/scholarships) and only online applications are accepted. Information on eligibility requirements for each scholarship, as well as a list of items that are needed to apply, can also be found on our website. Many, but not all, of the scholarships are tied to agriculture so we encourage any high school seniors and current college students to apply. The only overall eligibility requirement is that the recipient must reside in one of the counties served by Colonial Farm Credit (except for select Maryland scholarships).

The Foundation also financially supports organizations that provide education and community enrichment. Programs and services offered through agricultural commodity organizations and youth organizations such as 4-H, FFA, and Scouts are typical of projects the Foundation supports. Seed money for the Foundation was provided by Colonial Farm Credit, which continues to contribute on a regular basis. Additional funding for the Foundation's activities is provided through donations made by individuals, corporations, organizations, and other foundations. You can make a tax-deductible contribution to the Foundation as an excellent way to develop youth into the future leaders of your community! More information on donating to the Foundation is found on the website.

Message from the Chairman of the Board and the Chief Executive Officer

Colonial Farm Credit continued its mission of supporting rural communities and agriculture with reliable, consistent credit and financial services in 2019.

Growing conditions were challenging late in the year due to extreme dry weather in much of our territory. We continued our annual initiative of talking with customers during the fall to gauge any challenges that they may be faced with. Fortunately, many crops planted in the earlier part of the season were able to beat the dry conditions, and weather was favorable for many during harvest. As we know, uncertain markets led to price volatility as well, but overall risk is very manageable for our Association. We are well positioned to help our customers – see more on this below.

Loan demand was moderate overall for land, construction loans, working capital and equipment. Average loan volume was 2.24% higher than in 2018.

Credit quality remained very sound. At year end, non-earning assets (mainly loans for which the accrual of interest has been stopped) was 0.5 percent of total assets. This level was roughly the same as December 31, 2018 and matched the lowest level we have seen in over 11 years.

Net income in 2019 was \$16.7 million. This level was much higher than anticipated. The uptick compared to budget was supported mainly by these positive and non-recurring events:

- A \$2.8 million special distribution from AgFirst Farm Credit Bank (our funding bank),
- \$199 thousand of interest income from the reinstatement or payoff of several nonaccrual loans,
- Unexpected refunds from the Farm Credit System Insurance Corporation of \$130 thousand, and
- Provision for loan losses \$494 thousand lower than budget (also significantly lower than historical averages).

The events noted above and our strong credit quality and capital position allowed your board of directors to approve a patronage refund of \$14.5 million, which is the second highest patronage level that we have paid in our history.

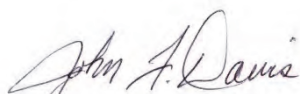

The \$14.5 million distribution will be paid out in April 2020. This compares quite favorably to the budgeted refund of \$8.9 million. We expect patronage distributions to return to historical budgeted ranges in future years.

This is the 22nd consecutive year that we have returned a portion of our profits to our customers. We are pleased to be in the financial position to return these earnings to you.

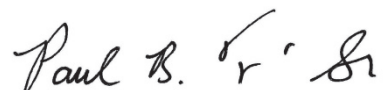

During 2020, we will continue to focus our efforts on serving the credit needs of all eligible customers and assisting customers who have been adversely impacted by farming conditions.

As the Farm Credit System enters its 104th year, your cooperative is positioned to prosper in any foreseeable environment by virtue of our strong financial position, diverse and high quality loan portfolio, sound underwriting standards, excellent employees, and exceptional governance. Our combination of competitive rates, patronage refunds, personal service, and extensive local knowledge is unmatched in the financial services world.

Thank you for your loyalty and support. We look forward to serving your financial needs in 2020 and beyond.

John F. Davis
Chairman of the Board

Report of Management

The accompanying consolidated financial statements and related financial information appearing throughout this annual report have been prepared by management of Colonial Farm Credit, ACA (Association) in accordance with generally accepted accounting principles appropriate in the circumstances. Amounts which must be based on estimates represent the best estimates and judgments of management. Management is responsible for the integrity, objectivity, consistency, and fair presentation of the consolidated financial statements and financial information contained in this report.

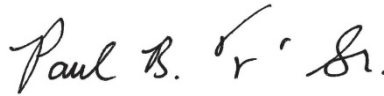

Management maintains and depends upon an internal accounting control system designed to provide reasonable assurance that transactions are properly authorized and recorded, that the financial records are reliable as the basis for the preparation of all financial statements, and that the assets of the Association are safeguarded. The design and implementation of all systems of internal control are based on judgments required to evaluate the costs of controls in relation to the expected benefits and to determine the appropriate balance between these costs and benefits. The Association maintains an internal audit program to monitor compliance with the systems of internal accounting control. Audits of the accounting records, accounting systems and internal controls are performed and internal audit reports, including appropriate recommendations for improvement, are submitted to the Board of Directors.

The consolidated financial statements have been audited by independent auditors, whose report appears elsewhere in this annual report. The Association is also subject to examination by the Farm Credit Administration.

The consolidated financial statements, in the opinion of management, fairly present the financial condition of the Association. The undersigned certify that we have reviewed the 2019 Annual Report of Colonial Farm Credit, ACA, that the report has been prepared under the oversight of the audit committee of the Board of Directors and in accordance with all applicable statutory or regulatory requirements, and that the information contained herein is true, accurate, and complete to the best of our knowledge and belief.

Report on Internal Control Over Financial Reporting

The Association's principal executives and principal financial officers, or persons performing similar functions, are responsible for establishing and maintaining adequate internal control over financial reporting for the Association's Consolidated Financial Statements. For purposes of this report, "internal control over financial reporting" is defined as a process designed by, or under the supervision of the Association's principal executives and principal financial officers, or persons performing similar functions, and effected by its Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting information and the preparation of the Consolidated Financial Statements for external purposes in accordance with accounting principles generally accepted in the United States of America and includes those policies and procedures that: (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Association, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial information in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures are being made only in accordance with authorizations of management and directors of the Association, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Association's assets that could have a material effect on its Consolidated Financial Statements.

The Association's management has completed an assessment of the effectiveness of internal control over financial reporting as of December 31, 2019. In making the assessment, management used the framework in *Internal Control — Integrated Framework (2013)*, promulgated by the Committee of Sponsoring Organizations of the Treadway Commission, commonly referred to as the "COSO" criteria.

Based on the assessment performed, the Association's management concluded that as of December 31, 2019, the internal control over financial reporting was effective based upon the COSO criteria. Additionally, based on this assessment, the Association determined that there were no material weaknesses in the internal control over financial reporting as of December 31, 2019.

Management's Discussion & Analysis of Financial Condition & Results of Operations

(dollars in thousands, except as noted)

GENERAL OVERVIEW

The following commentary summarizes the financial condition and results of operations of Colonial Farm Credit, ACA, (Association) for the year ended December 31, 2019 with comparisons to the years ended December 31, 2018 and December 31, 2017. This information should be read in conjunction with the Consolidated Financial Statements, Notes to the Consolidated Financial Statements and other sections in this Annual Report. The accompanying consolidated financial statements were prepared under the oversight of the Audit Committee of the Board of Directors. For a list of the Audit Committee members, refer to the "Report of the Audit Committee" reflected in this Annual Report. Information in any part of this Annual Report may be incorporated by reference in answer or partial answer to any other item of the Annual Report.

The Association is an institution of the Farm Credit System (System), which was created by Congress in 1916 and has served agricultural producers for over 100 years. The System's mission is to maintain and improve the income and well-being of American farmers, ranchers, and producers or harvesters of aquatic products and farm-related businesses. The System is the largest agricultural lending organization in the United States. The System is regulated by the Farm Credit Administration, (FCA), which is an independent safety and soundness regulator.

The Association is a cooperative, which is owned by the members (also referred to throughout this Annual Report as stockholders or shareholders) served. The territory of the Association extends across a diverse agricultural region of eastern Virginia and southern Maryland. Refer to Note 1, *Organization and Operations*, of the Notes to the Consolidated Financial Statements for counties in the Association's territory. The Association provides credit to farmers, ranchers, rural residents, and agribusinesses. Our success begins with our extensive agricultural experience and knowledge of the market.

The Association obtains funding from AgFirst Farm Credit Bank (AgFirst or Bank). The Association is materially affected and shareholder investment in the Association could be affected by the financial condition and results of operations of the Bank. Copies of the Bank's Annual and Quarterly Reports are on the AgFirst website, www.agfirst.com, or may be obtained at no charge by calling 1-800-845-1745, extension 2832, or writing to Susanne Caughman, AgFirst Farm Credit Bank, P. O. Box 1499, Columbia, SC 29202.

Copies of the Association's Annual and Quarterly reports are also available upon request free of charge on the Association's website, www.colonialfarmcredit.com, or by calling 1-804-746-1252, or writing to Diane Fowlkes, Colonial Farm Credit, ACA, 7104 Mechanicsville Turnpike, Mechanicsville,

VA 23111. The Association prepares an electronic version of the Annual Report, which is available on the website, within 75 days after the end of the fiscal year and distributes the Annual Reports to shareholders within 90 days after the end of the fiscal year. The Association prepares an electronic version of the Quarterly report, which is available on the internet, within 40 days after the end of each fiscal quarter, except that no report needs to be prepared for the fiscal quarter that coincides with the end of the fiscal year of the Association.

FORWARD LOOKING INFORMATION

This annual information statement contains forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions that are difficult to predict. Words such as "anticipates," "believes," "could," "estimates," "may," "should," "will," or other variations of these terms are intended to identify the forward-looking statements. These statements are based on assumptions and analyses made in light of experience and other historical trends, current conditions, and expected future developments. However, actual results and developments may differ materially from our expectations and predictions due to a number of risks and uncertainties, many of which are beyond our control. These risks and uncertainties include, but are not limited to:

- political, legal, regulatory and economic conditions and developments in the United States and abroad;
- economic fluctuations in the agricultural, rural utility, international, and farm-related business sectors;
- weather-related, disease, and other adverse climatic or biological conditions that periodically occur that impact agricultural productivity and income;
- changes in United States government support of the agricultural industry and the Farm Credit System, as a government-sponsored enterprise, as well as investor and rating-agency reactions to events involving other government-sponsored enterprises and other financial institutions; and
- actions taken by the Federal Reserve System in implementing monetary policy.

AGRICULTURAL OUTLOOK

Production agriculture is a cyclical business that is heavily influenced by commodity prices, weather, tax and trade policies, interest rates and various other factors that affect supply and demand. The following United States Department of Agriculture (USDA) analysis provides a general understanding of the U.S. agricultural economic outlook. However, this outlook does not take into account all aspects of the Association's business. References to USDA information in

this section refer to the U.S. agricultural market data and are not limited to information/data for the Association.

Agricultural production is a major use of land in the United States and the value of farm real estate accounted for 83 percent of the total value of the U.S. farm sector assets for 2019 according to the USDA in its February 5, 2020 forecast. Because real estate is such a significant component of the balance sheet of U.S. farms, the value of the farm real estate is a critical measure of the farm sector's financial performance. Changes in farmland values also affect the financial well-being of agricultural producers because farm real estate serves as the principal source of collateral for farm loans.

USDA's most recent forecast anticipates that farm sector equity, the difference between farm sector assets and debt, is predicted to rise 1.9 percent in 2019. Farm real estate value is expected to increase 1.8 percent and non-real estate farm assets are expected to increase 3.4 percent, while farm sector debt is forecast to increase 3.4 percent in 2019. Farm real estate debt as a share of total debt has been rising since 2014 and is expected to account for 61.7 percent of total farm debt in 2019.

The USDA is forecasting farm sector solvency ratios to increase slightly in 2019 to 15.5 percent for the debt-to-equity ratio and 13.5 percent for the debt-to-asset ratio, which represent the second highest levels since 2009, but well below the peak of 28.5 percent and 22.2 percent in 1985. Working capital (which is defined as cash and cash convertible assets minus liabilities due to creditors within 12 months) is forecast to decline 12.7 percent in 2019 to \$61 billion from \$70 billion in 2018. Farm sector working capital has steadily declined since peaking at \$165 billion in 2012.

The USDA's most recent forecast estimates net farm income (income after expenses from production in the current year; a broader measure of profits) for 2019 at \$93.6 billion, a \$9.8 billion increase from 2018, \$6.8 billion above the 10-year average and 24.3 percent below its peak of \$123.7 billion in 2013. However, in terms of inflation adjusted dollars, 2019 net farm income is \$2.7 billion below the 10 year average. The forecasted increase in net farm income for 2019, compared with 2018 is primarily due to increases in direct government payments of \$10.0 billion to \$23.7 billion, primarily driven by higher payments from the Market Facilitation Program (MFP). The MFP was first implemented in 2018 and continued in 2019 to assist farmers impacted by trade disruptions.

The USDA's outlook projects net farm income for 2020 to increase to \$96.7 billion, a \$3.1 billion or 3.3 percent increase from 2019. The forecasted increase in net farm income for 2020 is primarily due to expected increases in cash receipts for animals and products of \$8.2 billion and crop receipts of \$1.9 billion, partially offset by an \$8.7 billion decrease in direct government payments due to an expected decline in payments from the MFP. The increase in animal and products receipts reflects growth in hogs, milk, cattle and poultry/eggs receipts, while the crop receipts are driven by fruit/nuts and corn. Soybeans receipts are anticipated to decrease as lower quantities outweigh an increase in price.

Expected agricultural commodity prices can influence production decisions of farmers and ranchers on planted/harvested acreage of crops or inventory of livestock and

thus, affect the supply of agricultural commodities. Greater area of planted/ harvested acreage and increased crop yields for some crops in recent years have contributed to increased supply, which exceeded demand. Also impacting yields are the growing conditions that are sensitive to weather conditions. Although not generally affected by weather, livestock and dairy prices are linked to crop prices as feed is a significant input cost to these producers.

Global economic conditions also influence demand for food and agricultural products, which affects U.S. agricultural trade. Therefore, U.S. exports and imports shift to reflect changes in trade policies, world population and economic growth. Also impacting U.S. agricultural trade is global supplies and prices, changes in the value of the U.S. dollar and the government support for agriculture.

Severe wet weather during 2019 adversely affected growing conditions in some production areas. In addition, farmers in certain locations were also impacted by inclement weather during the fall harvest. The impact of the weather related conditions on production agriculture was partially offset by crop insurance proceeds. In addition to weather related challenges, reduced exports resulting from the trade tensions with China added to the already challenging agricultural economy. During 2018 and 2019, the MFP provided a material boost in farm sector income and in early 2020, the United States and China agreed to a "phase one" trade deal, which includes a significant commitment from China to buy agricultural products, among other items. However, the recent spread of the coronavirus (COVID-19) has created uncertainty about China's economic outlook and its ability to fulfill phase one commitments. Furthermore, African swine fever, which has been negatively impacting Asian hog production, may produce increased U.S. exports of pork and other protein products but could also negatively affect U.S. soybean exports.

The following table sets forth the commodity prices per bushel for certain crops, by hundredweight for hogs, milk, and beef cattle, and by pound for broilers and turkeys from December 31, 2016 to December 31, 2019:

Commodity	12/31/19	12/31/18	12/31/17	12/31/16
Hogs	\$47.30	\$43.40	\$48.60	\$43.10
Milk	\$20.70	\$16.60	\$17.20	\$18.90
Broilers	\$0.45	\$0.51	\$0.50	\$0.48
Turkeys	\$0.62	\$0.50	\$0.53	\$0.74
Corn	\$3.71	\$3.54	\$3.23	\$3.32
Soybeans	\$8.70	\$8.56	\$9.30	\$9.64
Wheat	\$4.64	\$5.28	\$4.50	\$3.90
Beef Cattle	\$118.00	\$117.00	\$118.00	\$111.00

The agricultural environment has been challenging during the past several years for many commodities. Currency fluctuations, ample inventories and U.S. trade policies, including retaliatory actions by other countries, have adversely impacted demand and prices for agricultural exports. This has reduced net farm income and eroded working capital from peak levels in 2012. The agriculture sector continues to adjust to market conditions. While producers' financial performance generally has been negatively impacted, MFP, crop insurance and producer operating adjustments have helped offset the severity of stress during the past two years.

Looking ahead, the MFP payments are not anticipated to continue and uncertainty remains about agricultural export markets. As a result, the Association's financial performance and credit quality may be negatively impacted but is expected to remain sound overall. Additionally, geographic and commodity diversification across the Association coupled with off-farm income support for many borrowers helps to mitigate the impact of periods of less favorable agricultural conditions. However, agricultural borrowers who are more reliant on off-farm income sources may be more adversely impacted by a weakened general economy.

CRITICAL ACCOUNTING POLICIES

The financial statements are reported in conformity with accounting principles generally accepted in the United States of America. Our significant accounting policies are critical to the understanding of our results of operations and financial position because some accounting policies require us to make complex or subjective judgments and estimates that may affect the value of certain assets or liabilities. We consider these policies critical because management must make judgments about matters that are inherently uncertain. For a complete discussion of significant accounting policies, see Note 2, *Summary of Significant Accounting Policies*, of the Notes to the Consolidated Financial Statements. The following is a summary of certain critical policies.

- *Allowance for loan losses* — The allowance for loan losses is maintained at a level considered adequate by management to provide for probable and estimable losses inherent in the loan portfolio. The allowance for loan losses is increased through provisions for loan losses and loan recoveries and is decreased through allowance reversals and loan charge-offs. The allowance for loan losses is determined based on a periodic evaluation of the loan portfolio by management in which numerous factors are considered, including economic and political conditions, loan portfolio composition, credit quality and prior loan loss experience.

Significant individual loans are evaluated based on the borrower's overall financial condition, resources, and payment record, the prospects for support from any financially responsible guarantor, and, if appropriate, the estimated fair value of any collateral. The allowance for loan losses encompasses various judgments, evaluations and appraisals with respect to the loans and their underlying security that, by nature, contain elements of uncertainty and imprecision. Changes in the agricultural economy and borrower repayment capacity will cause these various judgments, evaluations and appraisals to change over time. Accordingly, actual circumstances could vary from the Association's expectations and predictions of those circumstances.

Management considers the following factors in determining and supporting the level of allowance for loan losses: the concentration of lending in agriculture, combined with uncertainties in farmland values, commodity prices, exports, government assistance programs, regional economic effects and weather-related influences. Changes in the factors considered by management in the evaluation of losses in the loan

portfolios could result in a change in the allowance for loan losses and could have a direct impact on the provision for loan losses and the results of operations.

- *Valuation methodologies* — Management applies various valuation methodologies to assets and liabilities that often involve a significant degree of judgment, particularly when liquid markets do not exist for the particular items being valued. Quoted market prices are referred to when estimating fair values for certain assets for which an observable liquid market exists, such as most investment securities.

Management utilizes significant estimates and assumptions to value items for which an observable liquid market does not exist. Examples of these items include impaired loans, pension and other postretirement benefit obligations, and certain other financial instruments. These valuations require the use of various assumptions, including, among others, discount rates, rates of return on assets, repayment rates, cash flows, default rates, costs of servicing and liquidation values. The use of different assumptions could produce significantly different results, which could have material positive or negative effects on the Association's results of operations.

ECONOMIC CONDITIONS

The US economy grew 2.3% in 2019 and is expected to slow slightly to 2.0% in 2020. The projected slowdown in 2020 and beyond is primarily a side-effect of tariff and trade issues.

The Fed decreased interest rates three times in 2019. Despite the gradual slowdown in the U.S. economy, consumers remain supportive and the trend in consumer spending remains healthy. The housing market is rebounding, thanks in part to low interest rates. U.S. Housing demand remains high relative to inventory, contributing to existing home sales increasing 12.4 percent and the median sales price increasing by 6.7 percent from 2018 in the South region, according to the National Association of Realtors.

Economic conditions in Virginia and Maryland generally improved as payroll employment grew, business conditions strengthened and housing market indicators were fairly positive. According to *Forbes Magazine*, Virginia, again, was named the fourth best state in the country in which to do business based on costs, labor supply, regulatory environment, current economic climate, growth prospects, and quality of life. Maryland ranked thirty-fourth, a seven spot decline over last year.

As the period of low commodity prices continues, producers in many agricultural sectors face reduced profitability, particularly for certain row crops. Much of the Association's territory experienced drought conditions in the second half of the year. While the weather impacted yields, most areas still reported average overall yields.

The outlook for 2020 is generally forecasted to be similar to 2019, marked with moderate or declining economic growth, continued low commodity prices, and potentially rising interest rates.

LOAN PORTFOLIO

The Association provides funds to farmers, rural homeowners, processing and marketing operations, and farm-related businesses for financing of short and intermediate-term loans and long-term real estate mortgage loans through numerous product types.

The diversification of the Association loan volume by type for each of the past three years is shown below.

Loan Type	December 31,					
	2019		2018		2017	
Real estate mortgage	\$ 435,210	64.27 %	\$ 422,749	63.07 %	\$ 397,457	62.48 %
Production and intermediate-term	171,757	25.36	172,996	25.81	168,323	26.46
Loans to cooperatives	4,278	0.63	4,803	0.72	6,797	1.07
Processing and marketing	18,672	2.75	22,008	3.28	16,466	2.59
Farm-related business	5,730	0.85	5,483	0.82	5,868	0.92
Communication	578	0.09	513	0.08	602	0.09
Power and water/waste disposal	2,215	0.33	2,433	0.36	3,039	0.48
Rural residential real estate	35,455	5.23	36,287	5.41	34,572	5.43
International	3,306	0.49	2,997	0.45	2,995	0.47
Total	\$ 677,201	100.00 %	\$ 670,269	100.00 %	\$ 636,119	100.00 %

While we make loans and provide financially related services to qualified borrowers in the agricultural and rural sectors and to certain related entities, our loan portfolio is diversified.

The Association has a regional office in Hughesville, Maryland. All other regional offices are in the state of Virginia. The geographic distribution of loans by regional office for the past three years is as follows:

Regional Office	December 31,		
	2019	2018	2017
Farmville	26.16%	27.15%	26.97%
Hughesville	10.22	10.01	9.69
Mechanicsville	30.19	28.70	29.64
Tappahannock	9.30	9.89	8.88
Windsor	24.13	24.25	24.82
	100.00%	100.00%	100.00%

Commodity and industry categories are based upon the Standard Industrial Classification system published by the federal government. The system is used to assign commodity or industry categories based upon the largest agricultural commodity of the customer.

The major commodities in the Association's loan portfolio are shown below. As an additional hedge against agriculture industry risk, over 57 percent of the Association's loans at December 31, 2019 were made to borrowers whose repayment capacity was highly dependent upon off-farm income.

Commodity Group	Percent of Portfolio		
	2019	2018	2017
Field Crops	30%	29%	28%
Timber	30	29	28
Part-time Farmers and Other	19	21	23
Livestock	16	16	16
Rural Home	5	5	5
Total	100%	100%	100%

Repayment ability is closely related to the commodities produced by our borrowers, and increasingly, the off-farm income of borrowers, including part-time farmers. The

Association's loan portfolio includes field crops such as cash grains, peanuts, tobacco, and cotton; timber products; and livestock operations including poultry, dairy, beef cattle, swine, and horses. Many of these operations are diversified within their enterprise and/or with crop production, which reduces overall risk exposure. Demand, supply, weather, and international trade are some of the factors affecting the prices of these commodities. Even though the number and average loan size has increased over the past several years, the agricultural enterprise mix of these loans is diversified and similar to that of the overall portfolio. The risk in the portfolio associated with commodity concentration and large loans is reduced by the range of diversity of enterprises in the Association's territory.

The increase in gross loan volume for the twelve months ended December 31, 2019, is primarily attributed to increased demand for loans to finance real estate and working capital.

Over the past few years, the majority of the Association's growth has come from real estate mortgages, which make up over half of the Association's portfolio. Production and intermediate-term loans are also a substantial portion of the portfolio. The short-term portfolio, which is comprised heavily of working capital loans, normally reaches a peak balance in late summer and rapidly declines in the fall months as commodities are marketed and proceeds are applied to these loans. While working capital loan balances were repaid in the fall, outstanding balances increased during December to prepay operating expenses for the coming season.

During 2019, the Association continued buying loan participations within the System on a selective basis. This provides a means for the Association to spread credit concentration risk and realize non-patronage sourced interest and fee income. Despite the increase in loan balances for the participation portfolio in 2019, the portfolio has decreased over the last ten years as competition for quality credits has been strong.

Loan Participations:	December 31,		
	2019	2018	2017
Participations Purchased			
– FCS Institutions	\$ 54,464	\$ 50,459	\$ 54,837
Participations Sold	–	–	–
Total	\$ 54,464	\$ 50,459	\$ 54,837

The Association did not have any loans sold with recourse, retained subordinated participation interests in loans sold, or interests in pools of subordinated participation interests for the period ended December 31, 2019.

The Association sells qualified long-term residential mortgage loans into the secondary market. For the years ended December 31, the Association originated loans for resale totaling \$43,468 in 2019, \$38,515 in 2018, and \$44,775 in 2017, which were sold into the secondary market.

CREDIT RISK MANAGEMENT

Credit risk arises from the potential inability of an obligor to meet its repayment obligation. As part of the process to evaluate the success of a loan, the Association reviews the credit quality of the loan portfolio on an ongoing basis. With the approval of the Association Board of Directors, the Association establishes underwriting standards and lending policies that provide direction to the lending staff. Underwriting standards include, among other things, an evaluation of:

- Character – borrower integrity and credit history
- Capacity – repayment capacity of the borrower based on cash flows from operations or other sources of income
- Collateral – protection for the lender in the event of default and a potential secondary source of repayment
- Capital – ability of the operation to survive unanticipated risks
- Conditions – intended use of the loan funds

The credit risk management process begins with an analysis of the borrower’s credit history, repayment capacity, and financial position. Repayment capacity focuses on the borrower’s ability to repay the loan based upon cash flows from operations or other sources of income, including non-farm income. Long term real estate loans must be collateralized by first liens on real estate (collateral). As required by FCA regulations, each institution that makes loans on a collateralized basis must have collateral evaluation policies and procedures. Long term real estate mortgage loans may be made only in amounts up to 85 percent of the original appraised value of the property taken as collateral or up to 97 percent of the appraised value if guaranteed by a state, federal, or other governmental agency. The actual loan to appraised value when loans are made is generally lower than the statutory maximum percentage. Appraisals are required for most real estate loans of more than \$250. In addition, each loan is assigned a credit risk rating based upon the underwriting standards. This credit risk rating process incorporates objective and subjective criteria to identify inherent strengths, weaknesses, and risks in a particular relationship.

We review the credit quality of the loan portfolio on an ongoing basis as part of our risk management practices. Each loan is classified according to the Uniform Classification System, which is used by all Farm Credit System institutions. Below are the classification definitions.

- Acceptable – Assets are expected to be fully collectible and represent the highest quality.
- Other Assets Especially Mentioned (OAEM) – Assets are currently collectible, but exhibit some potential weakness.
- Substandard – Assets exhibit some serious weakness in repayment capacity, equity, and/or collateral pledged on the loan.
- Doubtful – Assets exhibit similar weaknesses to substandard assets. However, doubtful assets have additional weaknesses in existing facts, conditions and values that make collection in full highly questionable.
- Loss – Assets are considered uncollectible.

The following table presents selected statistics related to the credit quality of loans, including accrued interest, at December 31.

Credit Quality	2019	2018	2017
Acceptable & OAEM	99.13%	98.87%	98.31%
Substandard	0.87%	1.13%	1.69%
Total	100.00%	100.00%	100.00%

The Association had no loans with credit quality of Doubtful or Loss for the reporting periods above.

The Association’s loan portfolio is divided into performing and high-risk categories. The high-risk assets, including accrued interest, are detailed below:

High-risk Assets	December 31,		
	2019	2018	2017
Nonaccrual loans	\$ 2,344	\$ 2,804	\$ 5,123
Restructured loans	443	475	506
Accruing loans 90 days past due	–	–	–
Total high-risk loans	2,787	3,279	5,629
Other property owned	535	37	–
Total high-risk assets	\$ 3,322	\$ 3,316	\$ 5,629
Ratios			
Nonaccrual loans to total loans	0.35%	0.42%	0.81%
High-risk assets to total assets	0.49%	0.49%	0.88%

Nonaccrual loans represent all loans where there is a reasonable doubt as to the collection of principal and/or future interest accruals, under the contractual terms of the loan. In substance, nonaccrual loans reflect loans where the accrual of interest has been suspended. Nonaccrual loans decreased \$460 or 16.41 percent in 2019. The large reduction in nonaccrual loans in 2018 was primarily due to a large account that paid in full. In 2019, the reduction was primarily attributable to a loan that was transferred to other property owned. Several other accounts that were in nonaccrual status during the year were also either fully collected or reinstated due to the improved performance of the loan. Of the \$2,344 in nonaccrual volume at December 31, 2019, \$1,636 or 70 percent, compared to 58 percent and 74 percent at December 31, 2018, and 2017, respectively, were current as to scheduled principal and

interest payments, but did not meet all regulatory requirements to be reinstated to accrual status.

Loan restructuring is available to financially distressed borrowers who meet certain criteria. Restructuring of loans occurs when the Association grants a concession to a borrower based on either a court order or good faith in a borrower's ability to return to financial viability. The concessions can be in the form of a modification of terms or rates, a compromise of amounts owed, or deed in lieu of foreclosure. Other receipts of assets and/or equity to pay the loan in full or in part are also considered restructured loans. The type of alternative financing structure chosen is based on minimizing the loss incurred by both the Association and the borrower.

Allowance for Loan Losses

The allowance for loan losses at each period end was determined according to generally accepted accounting principles and considered by Association management to be adequate to absorb probable losses existing in and inherent to its loan portfolio.

The following table presents the activity in the allowance for loan losses for the most recent three years:

Allowance for Loan Losses Activity:	Year Ended December 31,		
	2019	2018	2017
Balance at beginning of year	\$ 2,245	\$ 2,427	\$ 3,006
Charge-offs:			
Real estate mortgage	(6)	(19)	(8)
Agribusiness	—	—	—
Rural residential real estate	—	—	(1)
Production and intermediate-term	(27)	(177)	(306)
Total charge-offs	(33)	(196)	(315)
Recoveries:			
Real estate mortgage	26	28	—
Agribusiness	—	—	—
Rural residential real estate	27	14	4
Production and intermediate-term	94	51	69
Total recoveries	147	93	73
Net (charge-offs) recoveries	114	(103)	(242)
Provision for (reversal of) loan losses	6	(79)	(337)
Balance at end of year	\$ 2,365	\$ 2,245	\$ 2,427
Ratio of net (charge-offs) recoveries during the period to average loans outstanding during the period	0.017%	(0.016)%	(0.038)%

The net loan charge-offs were primarily associated with default occurring in loans that were under-collateralized. Several nonaccrual loans were fully collected during the year.

The allowance for loan losses by loan type for the most recent three years is as follows:

Allowance for Loan Losses by Type	December 31,		
	2019	2018	2017
Real estate mortgage	\$ 1,488	\$ 1,371	\$ 1,287
Production and intermediate-term	637	633	912
Agribusiness	98	104	94
Communication	2	2	2
Power and Water/Waste Disposal	8	8	10
Rural residential real estate	121	117	112
International	11	10	10
Total allowance	\$ 2,365	\$ 2,245	\$ 2,427

The allowance for loan losses as a percentage of loans outstanding and as a percentage of certain other credit quality indicators is shown below:

Allowance for Loan Losses as a Percentage of:	December 31,		
	2019	2018	2017
Total loans	0.35%	0.33%	0.38%
Nonperforming loans	84.86%	68.47%	43.12%
Nonaccrual loans	100.90%	80.06%	47.38%

Please refer to Note 3, *Loans and Allowance for Loan Losses*, of the Notes to the Consolidated Financial Statements, for further information concerning the allowance for loan losses.

RESULTS OF OPERATIONS

Net Interest Income

Net interest income, the difference between interest income and interest expense, was \$21,302, \$21,403 and \$19,070 in 2019, 2018, and 2017, respectively. Net interest income is the principal source of earnings for the Association and is impacted by volume, yields on assets and cost of debt. The effects of changes in average volume and interest rates on net interest income over the past three years are presented in the following table:

Change in Net Interest Income:

	Volume*	Rate	Nonaccrual	
			Income	Total
12/31/19 - 12/31/18				
Interest income	\$ 859	\$ 1,561	\$ (1,160)	\$ 1,260
Interest expense	401	960	—	1,361
Change in net interest income	\$ 458	\$ 601	\$ (1,160)	\$ (101)
12/31/18 - 12/31/17				
Interest income	\$ 496	\$ 2,580	\$ 1,156	\$ 4,232
Interest expense	257	1,642	—	1,899
Change in net interest income	\$ 239	\$ 938	\$ 1,156	\$ 2,333

* Volume variances can be the result of increased/decreased loan volume or from changes in the percentage composition of assets and liabilities between periods.

Noninterest Income

Noninterest income for each of the three years ended December 31 is shown in the following table:

Noninterest Income	For the Year Ended			Percentage	
	December 31,			2019/	2018/
	2019	2018	2017	2018	2017
Loan fees	\$ 531	\$ 483	\$ 456	9.94 %	5.92 %
Fees for financially related services	67	69	51	(2.90)	35.29
Lease income	134	81	73	65.43	10.96
Patronage refund from other Farm Credit Institutions	6,386	7,337	7,843	(12.96)	(6.45)
Gains (losses) on sales of rural home loans, net	686	564	702	21.63	(19.66)
Gains (losses) on sales of premises and equipment, net	51	51	38	–	34.21
Gains (losses) on other transactions	72	(18)	80	500.00	(122.50)
FCSIC refund	130	835	–	(84.43)	100.00
Other noninterest income	68	101	120	(32.67)	(15.83)
Total noninterest income	\$ 8,125	\$ 9,503	\$ 9,363	(14.50)%	1.50 %

Fee income on loans increased \$48 from 2018 to 2019 as a result of origination fees for construction loans and late fees for past due loans.

The Association receives patronage refunds from the Bank based on its notes payable. In 2019, 2018, and 2017 the Association received a special patronage distribution of \$2,792, \$3,835, and \$4,377 respectively, in addition to the normal patronage of 75 basis points. The special patronage distribution is directly related to the Bank's earnings and capital level, which fluctuate.

Gains on sale of rural home loans increased \$122 or 22 percent for the year ended December 31, 2019 despite closing the same number of rural home loans in 2019.

Gains on other transactions increased \$90 or 500 percent for the year ended December 31, 2019. The increase in gains is primarily due to a gain from pension plan change due to market performance in 2019.

The Farm Credit System Insurance Corporation (FCSIC) issued a refund of \$130 in 2019 based on 2018 premiums paid, compared to a total refund of \$835 in 2018. The 2018 refund was comprised of \$512 Financial Assistance Corporation (FAC) stock and a \$323 premium refund based on premiums retained from prior years exceeding the 2% secure base requirement.

Other noninterest income decreased \$33 or 33 percent in 2019 primarily as a result of a lower volume of outstanding unclaimed equities to be transferred to income than required in 2018.

Noninterest Expense

Noninterest expense for each of the three years ended December 31 is shown in the following table:

Noninterest Expense	For the Year Ended			Percentage	
	December 31,			2019/	2018/
	2019	2018	2017	2018	2017
Salaries and employee benefits	\$ 9,219	\$ 9,237	\$ 8,573	(0.19)%	7.75 %
Occupancy and equipment	599	532	595	12.59	(10.59)
Insurance Fund premiums	425	415	678	2.41	(38.79)
(Gains)losses on other property owned, net	4	3	22	33.33	(86.36)
Other operating expenses	2,478	2,426	(555)	2.14	537.12
Total noninterest expense	\$ 12,725	\$ 12,613	\$ 9,313	0.89 %	35.43 %

Overall, salaries and employee benefits decreased from 2018 to 2019. While there was an increase in employee salaries from the addition of two positions and increased incentive pay, the increase was offset by decreased pension plan expense.

Insurance Fund premiums increased 2 percent for the year ended December 31, 2019, compared to 2018 as a result of an increase in insured debt outstanding. FCSIC set premiums at 9 basis points of adjusted insured debt outstanding for 2019, which was no change from the 2018 premium. In addition, there was a 10 basis point premium on the average principal outstanding of

nonaccrual loans and any other-than-temporarily impaired investments for all periods reported.

Other operating expenses increased \$52 from 2018 to 2019, primarily due to increased purchased services and employee and director training expenses, offset by decreased advertising and public relations expenses.

Income Taxes

The Association recorded a provision for income taxes of \$8 for the year ended December 31, 2019, as compared to a

provision of \$12 for 2018 and a provision of \$10 for 2017. Refer to Note 2, *Summary of Significant Accounting Policies, Income Taxes*, and Note 12, *Income Taxes*, of the Notes to the Consolidated Financial Statements, for more information concerning Association income taxes.

Key Results of Operations Comparisons

Key results of operations comparisons for each of the years ended December 31 are shown in the following table:

Key Results of Operations Comparisons	For the Year Ended		
	12/31/19	12/31/18	12/31/17
Return on average assets	2.45%	2.76%	2.99%
Return on average members' equity	8.61%	9.57%	10.66%
Net interest income as a percentage of average earning assets	3.20%	3.29%	3.00%
Net (charge-offs) recoveries to average loans	0.017%	(0.016)%	(0.038)%

A key factor in the growth of net income for future years will be continued improvement in net interest and noninterest income. Our goal is to generate earnings sufficient to fund operations, maintain adequate capitalization of the Association, and provide a strong patronage refund to our members. To meet this goal, the economy must continue the improvement shown in recent years and the Association must meet certain objectives. These objectives are to attract and maintain high quality loan volume priced at competitive rates and to manage credit risk in our entire portfolio, while efficiently meeting the credit needs of our members.

LIQUIDITY AND FUNDING SOURCES

Liquidity and Funding

The principal source of funds for the Association is the borrowing relationship established with the Bank through a General Financing Agreement (GFA). The GFA utilizes the Association's credit and fiscal performance as criteria for establishing a line of credit on which the Association may draw funds. The Bank advances the funds to the Association, creating notes payable (or direct loans) to the Bank. The Bank manages interest rate risk through direct loan pricing and asset/liability management. The notes payable are segmented into variable rate and fixed rate components. The variable rate note is utilized by the Association to fund variable rate loan advances and operating fund requirements. The fixed rate note is used specifically to fund fixed rate loan advances made by the Association. Association capital levels effectively create a borrowing margin between the amount of loans outstanding and the amount of notes payable outstanding. This margin is commonly referred to as "Loanable Funds."

Total notes payable to the Bank at December 31, 2019, were \$489,386 as compared to \$484,103 at December 31, 2018, and \$456,390 at December 31, 2017. The increases from 2018 to 2019 and from 2017 to 2018 were attributable to increased loan volume. The average volume of outstanding notes payable to the Bank was \$476,011 and \$463,773 for the years ended December 31, 2019 and 2018, respectively. Refer to Note 6, *Notes Payable to AgFirst Farm Credit Bank*, of the Notes to the Consolidated Financial Statements, for weighted

average interest rates and maturities, and additional information concerning the Association's notes payable.

Liquidity management is the process whereby funds are made available to meet all financial commitments including the extension of credit, payment of operating expenses and payment of debt obligations. The Association receives access to funds through its borrowing relationship with the Bank and from income generated by operations. The liquidity policy of the Association is to manage cash balances to maximize debt reduction and to increase loan volume. As borrower payments are received, they are applied to the Association's note payable to the Bank. The Association's participation in secondary market programs provides additional liquidity. Sufficient liquid funds have been available to meet all financial obligations. There are no known trends likely to result in a liquidity deficiency for the Association.

The Association had no lines of credit from third party financial institutions as of December 31, 2019.

Funds Management

The Bank and the Association manage assets and liabilities to provide a broad range of loan products and funding options, which are designed to allow the Association to be competitive in all interest rate environments. The primary objective of the asset/liability management process is to provide stable and rising earnings, while maintaining adequate capital levels by managing exposure to credit and interest rate risks.

Demand for loan types is a driving force in establishing a funds management strategy. The Association offers fixed, adjustable and variable rate loan products that are marginally priced according to financial market rates. Variable rate loans may be indexed to market indices such as the Prime Rate or the 90-day London Interbank Offered Rate (LIBOR). Adjustable rate mortgages are indexed to U.S. Treasury Rates. Fixed rate loans are priced based on the current cost of System debt of similar terms to maturity.

The majority of the interest rate risk in the Association's Consolidated Balance Sheets is transferred to the Bank through the notes payable structure. The Bank, in turn, actively utilizes funds management techniques to identify, quantify and control risk associated with the loan portfolio.

Future of LIBOR

In 2017, the United Kingdom's Financial Conduct Authority, which regulates LIBOR, announced its intention to stop persuading or compelling the group of major banks that sustains LIBOR to submit rate quotations after 2021. As a result, it is uncertain whether LIBOR will continue to be quoted after 2021. The Association has exposure to LIBOR, including in financial instruments that reference LIBOR that mature after 2021.

The exposure arises primarily from loans made to customers and the note payable to AgFirst Farm Credit Bank. Alternative reference rates that replace LIBOR may not yield the same or similar economic results over the lives of the financial instruments, which could adversely affect the value of, and return on, instruments held. In addition, to the extent that a successful transition of the LIBOR-based financial instruments

to an alternative rate based index that is endorsed or supported by regulators and generally accepted by the market as a replacement to LIBOR, there could be other ramifications including those that may arise as a result of the need to redeem or terminate such instruments.

Due to the uncertainty regarding the transition of LIBOR-based financial instruments, including when it will happen, the manner in which an alternative reference rate will apply, and the mechanisms for transitioning LIBOR-based instruments to instruments with an alternative rate, the expected financial impact of the LIBOR transition cannot yet be reasonably estimated.

The FCA has issued guidelines for System institutions to follow as they prepare for the expected phase-out of LIBOR. The guidelines direct each System institution to develop a LIBOR transition plan designed to provide an orderly roadmap of actions that will reduce LIBOR exposure over time. The FCA identified the following as important considerations in the development of each entity's transition plan:

- a governance structure to manage the transition,
- an assessment of exposures to LIBOR,
- an assessment of the fallback provisions in contracts and the impact of a LIBOR phase-out under those provisions,
- the establishment of strategies for reducing each type of LIBOR exposure,
- an assessment of the operational processes that need to be changed,
- a communication strategy for customers and shareholders,
- the establishment of a process to stay abreast of industry developments and best practices,
- the establishment of a process to ensure a coordinated approach, to the extent possible, across the District, and
- a timeframe and action steps for completing key objectives.

The Association will continue to analyze potential risks associated with the LIBOR transition, including financial, accounting, operational, legal, reputational and compliance risks.

At this time, it is difficult to predict whether or when LIBOR will cease to be available or if SOFR will become the benchmark to replace LIBOR. Because transactions occur involving financial instruments that reference LIBOR, these developments could have a material impact on the Association, borrowers, investors, and counterparties.

The following is a summary of Association variable-rate financial instruments with LIBOR exposure at December 31, 2019:

<i>(dollars in millions)</i>	Due in 2020	Due in 2021	Due in 2022 and Thereafter
Loans	\$ 8,466	\$ 6,959	\$ 30,050
Total Assets	<u>\$ 8,466</u>	<u>\$ 6,959</u>	<u>\$ 30,050</u>
Note Payable to AgFirst Farm Credit Bank	\$ 6,033	\$ 4,959	\$ 21,413
Total Liabilities	<u>\$ 6,033</u>	<u>\$ 4,959</u>	<u>\$ 21,413</u>

Relationship with the Bank

The Association's statutory obligation to borrow only from the Bank is discussed in Note 6, *Notes Payable to AgFirst Farm Credit Bank*, of the Notes to the Consolidated Financial Statements in this annual report.

The Bank's ability to access capital of the Association is discussed in Note 4, *Investment in Other Farm Credit Institutions*, of the Notes to the Consolidated Financial Statements.

The Bank's role in mitigating the Association's exposure to interest rate risk is described in the "Liquidity and Funding" section of this Management's Discussion and Analysis and in Note 6, *Notes Payable to AgFirst Farm Credit Bank*, included in this annual report.

CAPITAL RESOURCES

Capital serves to support asset growth and provide protection against unexpected credit and interest rate risk and operating losses. Capital is also needed for future growth and investment in new products and services.

The Association Board of Directors establishes, adopts, and maintains a formal written capital adequacy plan to ensure that adequate capital is maintained for continued financial viability, to provide for growth necessary to meet the needs of members/borrowers, and to ensure that all stockholders are treated equitably. There were no material changes to the capital plan for 2019 that would affect minimum stock purchases or would have an effect on the Association's ability to retire stock and distribute earnings.

Total members' equity at December 31, 2019, increased 0.87 percent to \$188,342 from the December 31, 2018 total of \$186,723. At December 31, 2018, total members' equity increased 1.39 percent from the December 31, 2017 total of \$184,165. The increases were attributed to net income partially offset by cash patronage.

Total capital stock and participation certificates were \$5,238 on December 31, 2019, compared to \$5,047 on December 31, 2018 and \$4,795 on December 31, 2017. The increases in 2018 and 2019 were related to stock purchased by new members.

PATRONAGE PROGRAM

Prior to the beginning of any fiscal year, the Association's Board of Directors, by adoption of a resolution, may establish a Patronage Allocation Program to distribute its available consolidated net earnings. This resolution provides for the application of net earnings in the manner described in the Association's Bylaws. This includes the setting aside of funds to increase surplus to meet minimum capital adequacy standards established by FCA Regulations, to increase surplus to meet Association capital adequacy standards to a level necessary to support competitive pricing at targeted earnings levels, and for reasonable reserves for necessary purposes of the Association. After excluding net earnings attributable to (a) the portion of loans participated to another institution, and

(b) non-patronage sourced participation loans purchased, remaining consolidated net earnings are eligible for allocation to borrowers. Refer to Note 7, *Members' Equity*, of the Notes to the Consolidated Financial Statements, for more information concerning the patronage distributions. The Association declared estimated patronage distributions of \$14,479 in 2019, \$16,117 in 2018, and \$11,046 in 2017.

The Association's Board of Directors adopted a resolution for 2019 that includes a provision to exclude interest contractually due in prior years from the basis on which patronage is factored for nonaccrual loans. This provision allows a borrower whose account(s) has been in nonaccrual status to receive patronage, on the current year's interest obligation, in the year that the account(s) returns to accruing status or is paid in full.

Additionally, the resolution also allows for a separate "pool" to be established for any loans originated by the Association for which a portion of the loan is sold as a participation to another lending institution.

YOUNG, BEGINNING AND SMALL (YBS) FARMERS AND RANCHERS PROGRAM

The Association's mission is to provide financial services to the agricultural and rural communities, which includes providing credit to Young, Beginning and Small farmers. Because of the unique needs of these individuals, and their importance to the future growth of the Association, the Association has established annual marketing goals to increase our market share of loans to YBS farmers. Specific marketing plans have been developed to target these groups, and resources have been designated to help ensure YBS borrowers have access to a stable source of credit.

The Association is committed to the future success of Young, Beginning and Small farmers.

- Young farmers are defined as those farmers, ranchers, producers or harvesters of aquatic products who are age 35 or younger as of the date the loan is originally made.
- Beginning farmers are defined as those farmers, ranchers, producers or harvesters of aquatic products who have 10 years or less farming or ranching experience as of the date the loan is originally made.
- Small farmers are defined as those farmers, ranchers, producers or harvesters of aquatic products who normally generate less than \$250 in annual gross sales of agricultural or aquatic products at the date the loan is originally made.

The following table outlines the loan volume and number of YBS loans in the loan portfolio for the Association.

	As of December 31, 2019	
	Number of Loans	Amount of Loans
Young	940	\$ 79,096
Beginning	2,401	\$228,353
Small	4,430	\$371,354

Note: For purposes of the above table, a loan could be classified in more than one category, depending upon the characteristics of the underlying borrower.

The 2012 USDA Ag census is used as a benchmark to measure penetration of the Association's marketing efforts. The census data indicated that within the Association's chartered territory there were 13,431 reported farmers of which by definition 582 or 4.3 percent were Young, 2,557 or 19.0 percent were beginning, and 12,519 or 93.2 percent were small. We will begin using the 2017 Ag census starting in 2020.

Comparatively, as of December 31, 2019, the demographics of the Association's agricultural portfolio contained 4,845 farmers, of which by definition 755 or 15.6 percent were Young, 2,049 or 42.3 percent were Beginning, and 3,505 or 72.3 percent were Small.

The Association currently has a high market share of YBS farmers within its territory. As of December 31, 2019, the Association was doing business with 129.7 percent of the Young farmers, 80.1 percent of the Beginning farmers, and 28.0 percent of the Small farmers identified by the 2012 USDA Ag census data. In spite of that large market share, the Association made 514 loans to farmers classified as Young, Beginning, or Small for \$58,625 in new volume for the year ending December 31, 2019. The Association has 34 guaranteed loans for \$3,625 to Young, Beginning, and Small farmers, representing 50.3 percent of the total volume of Association loans that are guaranteed by government agencies.

The board-approved YBS farmer goals for the next three years are to have loans with at least 55 percent of Young farmers, at least 55 percent of Beginning farmers, and at least 30 percent of Small farmers. These goals are based on the 2017 USDA Ag census. Progress towards meeting these goals is reported quarterly to the board of directors.

The following strategies and outreach programs have been conducted, allowing the Association to meet its objectives and goals of the YBS farmer program.

- Support of 4-H, FFA, and young farmer organizations through sponsorships and donations
- Sponsor seminars on farm transition planning and financial management.
- Promote FSA guaranteed loan program for YBS borrowers to allow the Association to manage risk while providing more opportunities and financing to this group
- Promote our youth loan program to provide loans to youth involved in 4H and FFA projects, primarily livestock or crop production
- Support the Colonial Agricultural Educational Foundation and Agriculture in the Classroom programs in Virginia and Maryland
- Participating with Virginia and Maryland Farm Bureaus in their young farmer programs
- Partner with neighboring Farm Credit Associations to offer the AgBiz Planner Program. This ten-module course teaches Young farmers about financial management and business planning
- Support YBS activities at Virginia Tech, Virginia State University, and University of Maryland
- Sponsorship and partnership with local farmers' markets and local food cooperatives
- Small farm loan program allows for a lower credit score threshold for applicants with small farms who meet other eligibility criteria

Capital

Effective January 1, 2017, the regulatory capital requirements for System Banks and associations were modified. The new regulations ensure that the System's capital requirements are comparable to the Basel III framework and the standardized approach that the federal banking regulatory agencies have adopted. New regulations replaced core surplus and total surplus ratios with common equity tier 1 (CET1) capital, tier 1 capital, and total capital risk-based capital ratios. The new regulations also include a tier 1 leverage ratio and an unallocated retained earnings equivalents (UREE) leverage ratio. The permanent capital ratio (PCR) remains in effect.

Risk-adjusted assets have been defined by FCA Regulations as the Balance Sheet assets and off-balance-sheet commitments adjusted by various percentages, depending on the level of risk inherent in the various types of assets. The primary changes which generally have the effect of increasing risk-adjusted assets (decreasing risk-based regulatory capital ratios) were as follows:

- Inclusion of off-balance-sheet commitments less than 14 months
- Increased risk-weighting of most loans 90 days past due or in nonaccrual status

Calculation of PCR risk-adjusted assets includes the allowance for loan losses as a deduction from risk-adjusted assets. This differs from the other risk-based capital calculations.

The ratios are calculated using three-month average daily balances, in accordance with FCA regulations, as follows:

- The CET1 capital ratio is the sum of statutory minimum purchased borrower stock, other required borrower stock held for a minimum of 7 years, allocated equities held for a minimum of 7 years or not subject to revolvement, unallocated retained earnings, paid-in capital, less certain regulatory required deductions including the amount of investments in other System institutions, divided by average risk-adjusted assets.
- The tier 1 capital ratio is CET1 capital plus non-cumulative perpetual preferred stock, divided by average risk-adjusted assets.
- The total capital ratio is tier 1 capital plus other required borrower stock held for a minimum of 5 years, subordinated debt and limited-life preferred stock greater than 5 years to maturity at issuance subject to certain limitations, allowance for loan losses and reserve for unfunded commitments under certain limitations less certain investments in other System institutions under the corresponding deduction approach, divided by average risk-adjusted assets.
- The permanent capital ratio is all at-risk borrower stock, any allocated excess stock, unallocated retained earnings, paid-in capital, subordinated debt and preferred stock subject to certain limitations, less certain investments in other System institutions, divided by PCR risk-adjusted assets.
- The tier 1 leverage ratio is tier 1 capital, divided by average assets less regulatory deductions to tier 1 capital.
- The UREE leverage ratio is unallocated retained earnings, paid-in capital, and allocated surplus not subject to revolvement less certain regulatory required deductions including the amount of allocated investments in other System institutions divided by average assets less regulatory deductions to tier 1 capital.

The following sets forth the regulatory capital ratios which were effective January 1, 2017:

Ratio	Minimum Requirement	Capital Conservation Buffer*	Minimum Requirement with Capital Conservation Buffer	Capital Ratios as of December 31,		
				2019	2018	2017
Risk-adjusted ratios:						
CET1 Capital Ratio	4.5%	1.875%	6.375%	26.62%	26.17%	25.94%
Tier 1 Capital Ratio	6.0%	1.875%	7.875%	26.62%	26.17%	25.94%
Total Capital Ratio	8.0%	1.875%	9.875%	26.99%	26.52%	26.38%
Permanent Capital Ratio	7.0%	0.0%	7.0%	26.71%	26.26%	26.05%
Non-risk-adjusted:						
Tier 1 Leverage Ratio	4.0%	1.0%	5.0%	27.90%	27.85%	27.72%
UREE Leverage Ratio	1.5%	0.0%	1.5%	27.94%	27.93%	27.85%

* The capital conservation buffers have a 3 year phase-in period and will become fully effective January 1, 2020. Risk-adjusted ratio minimums will increase 0.625% each year until fully phased in. There is no phase-in period for the tier 1 leverage ratio.

If the capital ratios fall below the minimum regulatory requirements, including the buffer amounts, capital distributions (equity redemptions, dividends, and patronage) and discretionary senior executive bonuses are restricted or prohibited without prior FCA approval. The following sets forth regulatory Capital ratios as previously reported:

	Regulatory Minimum	2016	2015	2014	2013	2012
Permanent Capital Ratio	7.00%	25.93%	25.31%	24.39%	23.62%	22.26%
Total Surplus Ratio	7.00%	25.29%	24.64%	23.69%	22.90%	21.52%
Core Surplus Ratio	3.50%	25.29%	24.64%	23.69%	22.90%	21.52%

REGULATORY MATTERS

On February 13, 2020, the Farm Credit Administration approved a rule that clarifies the factors that System institutions should consider when categorizing high-risk loans and placing them in nonaccrual status. The rule also revises the criteria by which loans are reinstated to accrual status, and revises the application of the criteria to certain loans in nonaccrual status to distinguish between the types of risk that cause loans to be placed in nonaccrual status.

On September 18, 2019, the Farm Credit Administration issued a proposed rule to amend its investment regulations to allow System associations to purchase and hold the portion of certain loans that non-System lenders originate and sell in the secondary market, and that the USDA unconditionally guarantees or insures as to timely payment of principal and interest. The rule would authorize associations to buy investments to augment the liquidity of rural credit markets, reduce the capital burden on community banks and other non-System lenders who choose to sell their USDA guaranteed portions of loans, and to enhance the ability of associations to manage risk. The public comment period ended on November 18, 2019.

On September 23, 2019, the Farm Credit Administration issued a proposed rule that would ensure the System’s capital requirements, including certain regulatory disclosures, reflect the current expected credit losses methodology, which revises the accounting for credit losses under U.S. generally accepted accounting principles. The proposed rule identifies which credit loss allowances under the Current Expected Credit Losses (CECL) methodology in the Financial Accounting Standards Board’s “Measurement of Credit Losses on Financial Instruments” are eligible for inclusion in a System institution’s regulatory capital. Credit loss allowances related to loans, lessor’s net investments in leases, and held-to-maturity debt securities would be included in a System institution’s Tier 2 capital up to 1.25 percent of the System institution’s total risk weighted assets. Credit loss allowances for available-for-sale debt securities and purchased credit impaired assets would not be eligible for inclusion in a System institution’s Tier 2 capital. In addition, the proposed regulation does not include a transition phase-in period for the CECL day 1 cumulative effect adjustment to retained earnings on a System institution’s regulatory capital ratios. The public comment period ended on November 22, 2019.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

Please refer to Note 2, *Summary of Significant Accounting Policies*, in the Notes to the Consolidated Financial Statements for recently issued accounting pronouncements.

The following Accounting Standards Updates (ASUs) were issued by the Financial Accounting Standards Board (FASB) but have not yet been adopted:

Summary of Guidance	Adoption and Potential Financial Statement Impact
<i>ASU 2016-13 – Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments</i>	
<ul style="list-style-type: none"> • Replaces multiple existing impairment standards by establishing a single framework for financial assets to reflect management’s estimate of current expected credit losses (CECL) over the complete remaining life of the financial assets. • Changes the present incurred loss impairment guidance for loans to an expected loss model. • The Update also modifies the other-than-temporary impairment model for debt securities to require an allowance for credit impairment instead of a direct write-down, which allows for reversal of credit impairments in future periods based on improvements in credit. • Eliminates existing guidance for purchased credit impaired (PCI) loans, and requires recognition of an allowance for expected credit losses on these financial assets. • Requires a cumulative-effect adjustment to retained earnings as of the beginning of the reporting period of adoption. • Effective for fiscal years beginning after December 15, 2022, and interim periods within those fiscal years. Early application is permitted. 	<ul style="list-style-type: none"> • Implementation efforts began with establishing a cross-discipline governance structure. The implementation includes identification of key interpretive issues, scoping of financial instruments, and assessing existing credit loss forecasting models and processes against the new guidance. • The new guidance is expected to result in a change in allowance for credit losses due to several factors, including: <ol style="list-style-type: none"> 1. The allowance related to loans and commitments will most likely increase to cover credit losses over the full remaining expected life of the portfolio, and will consider expected future changes in macroeconomic conditions, 2. An allowance will be established for estimated credit losses on any debt securities, 3. The nonaccretable difference on any PCI loans will be recognized as an allowance, offset by an increase in the carrying value of the related loans. • The extent of change is under evaluation, but will depend upon the nature and characteristics of the financial instrument portfolios, and the macroeconomic conditions and forecasts at the adoption date. • The guidance is expected to be adopted in first quarter 2023.

Disclosure Required by Farm Credit Administration Regulations

Description of Business

Descriptions of the territory served, persons eligible to borrow, types of lending activities engaged in, financial services offered and related Farm Credit organizations are incorporated herein by reference to Note 1, *Organization and Operations*, of the Consolidated Financial Statements included in this Annual Report to shareholders.

The description of significant developments that had or could have a material impact on earnings, interest rates to borrowers, borrower patronage or dividends, acquisitions or dispositions of material assets, material changes in the manner of conducting the business, seasonal characteristics, concentrations of assets, and changes in patronage policies or practices, if any, is incorporated in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” included in this Annual Report.

The association is involved in two Unincorporated Business Entities (UBE), which were organized for the purpose of acquiring and managing unusual or complex collateral associated with loans.

Ethanol Holding Company, LLC, is a Delaware Limited Liability Company. The entity was organized for stated purpose of acquiring, holding, managing, preserving and, if appropriate, operating the assets of BFE Operating Company, LLC, Buffalo Lakes Energy, LLC and Pioneer Trail Energy, LLC (the “BFE Entities”) and Ethanol Holding Company Minnesota Sub, LLC and Ethanol Holding Company Nebraska Sub, LLC, until such time as such assets may be sold or otherwise disposed of pursuant to the terms of the Operating Agreement of Ethanol Holding Company, LLC.

Colonial OPO, LLC is a limited liability company in Virginia. The sole purpose of Colonial OPO is to acquire, hold, manage, preserve, and if appropriate, operate the assets of acquired property associated with loans until the time such assets may be sold or otherwise disposed.

Description of Property

The following table sets forth certain information regarding the properties of the reporting entity, all of which are located in Virginia or Maryland:

Location	Description	Form of Ownership
7104 Mechanicsville Tnpg. Mechanicsville, VA	Administrative/ Regional Office	Owned
135 Queen Street Tappahannock, VA	Regional Office	Owned
18639 Eltham Road West Point, VA	Office	Owned
428 E. Main Street Waverly, VA	Office	Owned
11295 Windsor Boulevard Windsor, VA	Regional Office	Owned
1700-A S. Main Street Farmville, VA	Regional Office	Owned
201 E. Danville Street South Hill, VA	Office	Owned
22323 E. Main Street Courtland, VA	Office	Rented ⁽¹⁾ (\$1,041 per month)
7431 Old Leonardtown Road Hughesville, MD	Regional Office	Rented ⁽²⁾ (\$3,820 per month)
13915 Boynton Plank Road Ste B Dinwiddie, VA	Office	Rented ⁽³⁾ (\$850 per month)
22776 Timberlake Road Ste A Lynchburg, VA	Office	Rented ⁽⁴⁾ (\$1,337 per month)
135 Hanbury Road Ste C - 2 Chesapeake, VA	Office	Rented ⁽⁵⁾ (\$1,504 per month)
2987 River Road West Goochland, VA	Office	Rented ⁽⁶⁾ (\$1,500 per month)

- (1) 2 year lease terminating on February 29, 2020.
- (2) 3 year lease terminating on May 31, 2022.
- (3) 2 year lease terminating on August 31, 2021.
- (4) 5 year lease terminating on February 28, 2024.
- (5) 3 year lease terminating on July 31, 2020.
- (6) 2 year lease terminating on February 1, 2021.

Legal Proceedings

Information, if any, to be disclosed in this section is incorporated herein by reference to Note 11, *Commitments and Contingencies*, of the Consolidated Financial Statements included in this Annual Report.

Description of Capital Structure

Information to be disclosed in this section is incorporated herein by reference to Note 7, *Members’ Equity*, of the Consolidated Financial Statements included in this Annual Report.

Description of Liabilities

The description of liabilities, contingent liabilities and obligations to be disclosed in this section is incorporated herein by reference to Notes 2, 6, 9 and 12 of the Consolidated Financial Statements included in this Annual Report.

Management’s Discussion and Analysis of Financial Condition and Results of Operations

“Management’s Discussion and Analysis of Financial Condition and Results of Operations,” which appears in this Annual Report and is to be disclosed in this section, is incorporated herein by reference.

Senior Officers

The following represents certain information regarding the senior officers of the Association and their business experience for the past five years:

Senior Officer	Position
Paul B. Franklin Sr.	<i>President and Chief Executive Officer</i> since March 2017. Previously served as Chief Lending Officer for the Association. Serves as Treasurer and director for the Hanover Education Foundation (non-profit scholarship administration and education advocacy organization) and a director for the Virginia Agribusiness Council (advocates for the business interests of the diversified industry of agricultural and forestry).
James S. Belfield	<i>Chief Information Officer</i> since April 2000. Serves as a board member of the Virginia Cooperative Council (trade association for cooperatives).
Diane S. Fowlkes	<i>Chief Financial Officer and Treasurer</i> since August 2013. Serves as a director and finance committee chairperson for the Virginia Foundation for Agriculture in the Classroom (provides youth agricultural education).
Ronnie G. Gill	<i>Chief Lending Officer -Branch Operations</i> since October 2012. Serves as Treasurer for the Virginia Grain Producers Association (promotion and marketing of grain). He also serves as a director for the Northern Neck Farm Museum (antique farm museum), the Virginia Tech College of Agriculture and Life Sciences Alumni Organization (support of college and alumni enrichment), and in November 2019, he was elected to the Essex County Board of Supervisors (effective January 1, 2020)..
Michael J. Lacks	<i>Chief Lending Officer-Commercial Loans</i> since March 2017. Previously served as Relationship Manager in the Commercial Loan Group for the Association.
Karen Suzanne Nicely	<i>Chief Human Resources and Corporate Secretary</i> since October 2003.
Patrick J. Tewell	<i>Chief Credit Officer</i> since January 2017. Previously served as Examiner for Farm Credit Administration.

The total amount of compensation earned by the CEO and all senior officers and other highly compensated employees as a group during the years ended December 31, 2019, 2018, and 2017, is as follows:

Name of Individual or Number in Group	Year	Salary	Bonus	Deferred Comp.	Change in Pension Value	Perq/ Other*	Total
Paul B. Franklin	2019	\$ 274,542	\$ 59,719	\$ –	\$ 565,545	\$ 15,585	\$ 915,391
Paul B. Franklin	2018	\$ 261,468	\$ 57,750	\$ –	\$ 175,826	\$ 14,828	\$ 509,872
Paul B. Franklin	2017	\$ 238,724	\$ 53,750	\$ –	\$ 410,646	\$ 13,208	\$ 716,328
Greg B. Farmer (retired in March, 2017)	2017	\$ 69,001	\$ 14,410	\$ –	\$ 977,753	\$ 4,088	\$ 1,065,252
6	2019	\$ 883,535	\$ 181,787	\$ –	\$ 1,283,219	\$ 60,177	\$ 2,408,718
6	2018	\$ 849,090	\$ 177,374	\$ –	\$ (72,759)	\$ 62,882	\$ 1,016,587
7	2017	\$ 846,857	\$ 304,605	\$ –	\$ 629,890	\$ 72,859	\$ 1,854,211

* The Perquisites/Other amount disclosed in the above chart includes company contributions to 401(k) plan (See Note 9, Employee Benefits Plans, to the Financial Statements), group life insurance premiums, compensation value for Association provided automobile , spouse travel expense and Farm Credit apparel expense.

The disclosure of information on the total compensation paid during 2019 to any senior officer or to any other employee included in the aggregate group total as reported in the table above is available and will be disclosed to the shareholders of the institution upon request.

The institution’s shareholders have the authority to petition for an advisory vote on CEO and senior officers’ compensation. For the year ended December 31, 2019, no advisory votes were held.

The present value of pension benefits is the value at a specific date of the expected future benefit payment stream based on actuarial assumptions, chiefly the discount rate. Other assumptions are also used, such as expected retirement age and life expectancy. Changes in the actuarial assumptions can increase or decrease the pension values.

The discount rate, which is derived using an AA corporate bond yield curve, is updated every year based on the interest rate environment at December 31. A decrease in the discount rate will normally increase the present values and vice versa. In most cases, an increase in the discount rate assumption from

the prior year partially offset by an increase in benefits earned caused the pension values to decrease at December 31, 2019.

At December 31, 2014, the life expectancy actuarial assumption was updated to reflect recent mortality studies indicating longer life spans. This change increased pension values as the benefit payments are expected to be made for a longer time span.

The disclosure of information on the total compensation paid during 2019 to any senior officer or to any other employee included in the aggregate group total as reported in the table above is available and will be disclosed to the shareholders of the institution upon request.

Two individuals included in the senior officer or other highly compensated employee group had \$0 changes in the value of pension benefits. Due to their hire dates, they are not eligible for the defined benefit pension plan but participate in the defined contribution Farm Credit Benefits Alliance 401(k) plan. See *Note 9, Employee Benefit Plans* for additional details.

Prior to the end of each fiscal year the Board reviews the appropriateness of an incentive plan for all Association employees for the following year. In addition to a base salary, employees and senior officers can earn additional compensation under an incentive plan. The Association's 2019 incentive plan was designed to motivate employees to exceed the business plan goals during the fiscal year and covered all staff members employed as of December 31, 2019. A separate incentive plan is in place for appraisal personnel. The plan focused on meeting target earnings, patronage distribution, credit administration, credit quality, and customer service goals. The plan allowed for both individual and group incentives based on performance criteria. Allowable incentives ranged up to 22 percent of base pay at the end of the plan year for senior officers, and up to 19 percent of base pay in effect at the end of the plan year for other employees depending upon their position. Also, all employees are eligible to receive awards based upon 1) years of service or 2) exceptional performance as defined in the plan. Bonuses and incentives are shown in the year earned and are paid in the first quarter of the subsequent year.

All employees are reimbursed for all direct travel expenses incurred when traveling on Association business. A copy of the travel policy is available to shareholders upon written request.

The compensation plan for the CEO and other senior officers is approved annually by the Compensation Committee, guided by the following policy objective:

To provide a comprehensive compensation plan that assists management in attracting and retaining professional, motivated, customer-oriented employees, and which appropriately rewards employees taking into consideration competition, local-market compensation levels, expertise, experience and contributions (individual and team) to the association's success. These objectives will be accomplished by:

- Utilizing the AgFirst District salary and grade schedules, as well as other market data and studies, for grade placement, merit increases and salary level.
- Participating in AgFirst District benefit plans, as well as offering other benefits as deemed appropriate by the board.
- Utilizing a combination of salary, variable pay, benefits and special awards.
- Tying compensation to the achievement of business plan objectives and individual goals, and emphasizing balance among the four primary critical performance areas: business development, asset quality, earnings and human resources.
- Providing an honest and objective performance appraisal review to each employee at least annually.

The CEO and other senior officers participate in the identical compensation, retirement, incentive and benefit plans, with the exception of the recently retired CEO's supplemental non-qualified retirement plan, as described below.

Senior officers are paid a competitive, market-based salary commensurate with their tenure, expertise and education. Salary ranges for each position are adjusted periodically based on compensation studies. Senior officers are eligible for an annual salary increase based on merit, as determined by an annual performance appraisal review documenting individual performance relative to individual goals and business plan objectives for the calendar year. The CEO's performance evaluation and any merit increase are approved by the Board of Directors in December, upon recommendation from the Compensation Committee. The CEO prepares and approves the annual performance appraisal review and determines merit increases for other senior officers in February. Merit increases for all senior officers are effective February 1, and generally fall within ranges approved annually by the Compensation Committee. These ranges are differentiated by individual performance rating and current salary relative to the salary range midpoint. Merit increases are typically not granted once an employee reaches the mid-point of the salary range, which is considered the "market value" of the job. Salary ranges are adjusted annually based on market studies.

The Association's salary plan for senior officers (including annual merit increases) provides a base compensation plan that is market-driven, allowing for the attraction and retention of professional managers to implement the Association's strategic and annual business plans. Attracting and retaining high quality employees is critical to the Association's long-term success, including the goal of filling mid-level management and senior officer positions from within. A low rate of senior officer turnover is critical in achieving our mission and providing stable leadership and strong financial performance. Overall senior officer salaries are controlled by the Compensation Committee's approval of salary ranges and merit increase ranges.

Senior officers participate in an incentive compensation plan. The objectives of this plan are to:

- Ensure compensation structure is consistent with the Association's core purpose, core values and strategic business plan,

- Focus decisions and actions on key operating objectives that will provide long-term financial growth and stability to the Association,
- Provide competitive compensation packages in order to attract, motivate, reward and retain superior employees,
- Provide flexibility to management in assigning workload to maximize allocation of resources and expertise,
- Reinforce a sales culture,
- Emphasize teamwork, and
- Respond to an increasingly significant practice of goal oriented cash incentives among financial institutions.

This incentive plan contains several Association-level performance measures which must be met before a payout under either of the two components described below is possible, including: payment of a patronage refund, compliance with funding bank loan agreement covenants, not being under a regulatory enforcement action, and minimum credit management, credit quality and customer service measures. Payments under either component are based upon performance for the previous calendar year and are made during the first quarter, after the annual external audit is finalized.

The incentive plan contains a profit sharing component. In order to receive payment under this component, the senior officer must receive an “effective” overall annual performance rating, and the Association’s core earnings must be equal to or greater than budget. Payout is in increments from 3 percent up to a maximum of 7 percent of year-end salary, depending upon the level of core earnings relative to budget.

The incentive plan also contains an individual performance incentive component, whereby the senior officer can earn up to an additional 15 percent of year-end salary if his/her annual performance rating falls into the highest quadrant (“highly effective”). The level of incentive paid to the CEO, if any, is approved by the board of directors upon recommendation from the Compensation Committee. Payments to other senior officers are determined by the CEO.

Incentive-based compensation for senior officers is reasonable and proportionate to the services performed and results achieved, and it is structured to prevent undue risk to the Association, by virtue of:

- The plan’s structure which prevents payout if the Association is experiencing financial or credit problems, doesn’t pay a patronage to customers, is not adequately serving its customers or is under a regulatory enforcement action,
- Senior officers having to achieve at least “effective” overall performance ratings to receive payment, and
- The total maximum payment for senior officers being a modest 22 percent of salary, with actual payout level determined by both individual and overall Association performance.

Senior officers participate in plans, depending upon their original date of employment.

A defined benefit plan is provided those officers employed prior to January 1, 2003. Benefits are determined based on years of service times highest consecutive thirty-six month average salary times 2 percent. Full benefit payments are payable upon retirement at age 65, or at age 62 with 10 years of service. Additionally, unreduced benefits are payable based on the “rule of 85”, provided the officer is at least 55 years of age and his/her age plus years of service total at least 85.

Senior officers employed on or after January 1, 2003 receive a nonelective employer contribution of 3 percent of total compensation into the 401(k) savings plan. Additionally, any balances accrued under the defined contribution plan (Cash Balance Plan) were disbursed to plan participants in March 2017 according to his/her individual distribution election. See *Note 9- Employee Benefit Plans*.

The Association sponsors a non-qualified, defined-benefit, supplemental executive retirement plan for the former CEO, who recently retired, and the current CEO. The purpose of the non-qualified plan is to provide benefits that supplement the IRS limitations imposed on the qualified defined-benefit plan in which the Association’s employees participate. For eligible key employees, compensation in excess of the 401(a) (17) limit and benefits in excess of the 415(b) limit in the qualified defined-benefit plan will be made up through the non-qualified plan. As a non-qualified plan, assets have been allocated and separately invested for this plan, but are not isolated from the general creditors of the Association.

This plan does not expand total compensation or the Association’s expenses, but serves only to make the employee “whole” considering IRS payment limitations on the qualified retirement plan.

The total accumulated pension benefits for the CEO and all senior officers as a group as of December 31, 2019, are as follows:

Name of Individual or Number in Group	Year	Plan Name	Number of Years Credited Service	Actuarial Present Value of Accumulated Benefits	Payments During 2019
CEO:					
Paul B. Franklin, Sr.	2019	AgFirst Retirement Plan	30	\$ 2,392,883	\$ –
				–	–
				<u>\$ 2,392,883</u>	<u>\$ –</u>
Senior Officers and Highly Compensated Employees:					
6 employees, excluding the CEO					
	2019	AgFirst Retirement Plan	22*	\$ 5,567,512	\$ –
				–	–
				<u>\$ 5,567,512</u>	<u>\$ –</u>

*Represents the average years of credited service for the group

Senior officers may also participate in a 401(k) savings plan, with the level of Association matching contributions determined by date of employment. For officers employed before January 1, 2003, the Association matches employee contributions 50 percent up to 6 percent of salary. For those hired after December 31, 2002, the Association matches employee contributions 100 percent up to 6 percent of salary. Various investment options are available for these funds, and vesting is immediate.

Market-based retirement and tax advantaged savings plans for senior officers are critical components to a competitive overall compensation plan. Such a plan is necessary for the attraction and retention of professionals capable of effectively implementing the Association's strategic and annual business plans. Association financial risk is mitigated by adjusting provisions when necessary to control costs and remain competitive, such as was done for employees hired after December 31, 2002, and subsequent changes to the defined contribution retirement plan and 401(k) savings plan.

Senior officers participate in various other benefits which are also offered to all employees, such as: medical insurance; annual, holiday and sick leave; life and disability insurance; and, milestone service awards. Additionally, senior officers are reimbursed for out-of-pocket business travel, lodging and subsistence costs. A copy of the reimbursement policy is available upon request.

The Association's strong performance during 2019 in the areas of earnings, credit quality, capital, liquidity and audit results supported payouts from both components of the incentive plan described near the maximum levels. Virtually all business plan objectives and goals were met or exceeded with the exception of asset growth. Further, the individual and team performance of the CEO and other senior officers were consistent with the level of these incentive payments and with their overall compensation.

Directors

The following chart details the year the director began serving on the board, the current term of expiration, and total cash compensation paid:

DIRECTOR	ORIGINAL YEAR OF ELECTION OR APPOINTMENT	CURRENT TERM EXPIRATION	TOTAL COMP. PAID DURING 2019
John F. Davis <i>Chairman</i>	2005	2020	\$13,600
A. Kevin Monahan <i>Vice Chairman</i>	2011	2023	\$7,100
John E. Bickford* <i>Appointed Stockholder Director</i>	2014	2022	\$9,750
R. Bertsch Cox <i>Appointed Director</i>	2017	2021	\$11,600
Jennifer U. Cuthbertson <i>Appointed Director</i>	2007	2021	\$10,800
Clarke E. Fox	1997	2021	\$12,700
Jeffrey W. Griffith	2014	2020	\$7,000
Hugh S. Jones	2003	2021	\$14,200
Robert M. Jones	2013	2021	\$9,200
L. Wayne Kirby	2005	2020	\$9,000
Frankie R. Large	2017	2023	\$12,000

Paul W. Rogers, Jr.	1988	2022	\$12,600
Steven H. Walter	2018	2022	\$5,600
Robert R. Womack	2014	2022	\$6,200
			<u>\$151,750</u>

* John E. Bickford also previously served from 2005-2013.

The following represents certain information regarding the directors of the Association, including their principal occupation and employment for the past five years. Unless specifically listed, the principal occupation of the board member for the past five years has been as a self-employed farmer.

Mr. John E. Bickford, Chairman of the Board (January – October 2019, Compensation Committee, and Executive Committee, is a consulting forester involved in timber management, timber sales, and timber evaluations for non-industrial landowners. He owns Bickford Timber and Land Management, Inc., a timber consulting and management business. He also serves as a licensed real estate agent for Cox & Company Real Estate and Insurance and as a member of Buckingham County Planning Commission.

Mr. John F. Davis, Chairman of the Board (November – December 2019) and Audit Committee Chairman (January – December 2019), is a retired farmer and self-employed farm consultant for Mill Creek Farms, LLC.

Mr. A. Kevin Monahan, Vice Chairman of the Board and Chairman of the Governance Committee, is a row crop, beef cattle, and timber farmer and owner of Monahan Farms, LLC and Bowling Green Farms, LLC. Mr. Monahan also serves on the board of the Surry County, Virginia, Planning Commission (county planning), and the Colonial Agricultural Educational Foundation (provides funding for college scholarships and other youth education).

Mr. R. Bertsch Cox is the Chief Financial Officer/CPA and shareholder for James River Equipment (equipment dealer). He also serves as chairman of the board for Virginia Foundation for Agriculture in the Classroom (provides youth agriculture education) and as a member of the Farm Credit System Audit Committee.

Mrs. Jennifer U. Cuthbertson, Audit Committee Chairman (effective January 1, 2020) is a watermelon, pumpkin, goat, cattle, wheat, corn, soybean, grain sorghum, timber, and hay farmer, and a tax advisor for H&R Block. Mrs. Cuthbertson was a business analyst for Southern States Cooperative (agricultural supply cooperative) until May 2009 and served as a seasonal customer service representative for FERIDIES (retail sales and promotion of Virginia peanuts). She works part-time as a Southampton County 4-H assistant.

Mr. Clarke E. Fox, Legislative Committee Chairman, serves as President of Foxhill Farms, Inc., a peanut, cotton, corn, soybean, watermelon, and timber farm.

Mr. Jeffrey W. Griffith is a grain, hay, and vegetable farmer. He serves as a director of the Anne Arundel County Farm Bureau (agriculture, insurance, service, and lobbying organization) and is a member of Future Farmers of America Alumni (promoting FFA) and the Maryland Soybean Board (administering checkoff).

Mr. Hugh S. Jones is president, majority owner, and operator of Richlands Dairy Farm, Inc. and is a shareholder in Richlands Creamery, LLC. Mr. Jones also serves as a director and member of the steering committee of the Virginia Tech Southern Virginia Research Station (agricultural research) and as a director of the Nottoway Planning Commission (county planning).

Mr. Robert M. Jones is the owner of Poor House Dairy Farm. Mr. Jones also serves as a director of Farmers' Cooperative (agricultural production products), a director of Cooperative Milk Producers (milk marketing), a board member of Prince Edward County Board of Supervisors, and a board member of Prince Edward County Planning Commission.

Mr. L. Wayne Kirby is a row crop farmer and owner of Creamfield Farm LLC and a commissioned agent for Helena Chemical Company (agricultural chemical sales and consultation). Mr. Kirby serves as a director of the Colonial Agricultural Educational Foundation (provides funding for college scholarships and other youth education), the Virginia Grain Producers Association, Inc. (promotion and marketing of grain), and the Virginia Agribusiness Council (industry lobbying organization), and serves on the Virginia Board of Agriculture and Consumer Services (promotes Virginia agriculture interests).

Mr. Frankie R. Large is an owner/operator of Cherry Hill Farm (cow/calf operation) and a contract hog grower for Smithfield Foods. He serves as vice-president of Buckingham Farm Bureau (agriculture insurance, service, and lobbying organization) and as a member of USDA Farm Service Agency County committee (liaison between the farm community and the U.S. Department of Agriculture).

Mr. John N. Mills, Jr., is a partner in John N. Mills & Sons family farm business (growing and marketing corn, wheat, barley, soybean, and beef cattle). He serves as a director of the Virginia Identity Preserved Grains (small grain promotion and marketing) and the King William County Farm Bureau (agriculture insurance, service, and lobbying organization). He is also a partner in H&F LLC, which is a partner in York River Mitigation Bank (wetlands mitigation development).

Mr. Paul W. Rogers, Jr., is a partner of Rogers Farms Partnership, a cotton, grain, timber, and peanut farm and owner of Paul W. Rogers, Jr., LLC. Mr. Rogers serves as a director for the Peanut Standards Board (promotes peanuts).

Mr. Steven H. Walter is an owner/operator of H&S Farms LLC, a soybean, wheat, and, barley farm and president of Walter Greenhouses, Inc. (vegetables and greenhouse plants). He is also a seasonal worker for Suburban Propane (delivers propane). He serves as president and director of Charles County Farm Bureau (agriculture insurance, service, and lobbying organization), director of Maryland Farm Bureau Political Action Committee, Maryland Farm Bureau representative on Southern Maryland Ag Development Commission, and member of the Charles County Extension Advisory Committee.

Mr. Robert R. Womack is owner and operator of Woodville Farm, Inc., a poultry, beef cattle, and row crop farm. He is vice president of Buckingham Cattleman Association (breed promotion and marketing) and a director of Farmers' Cooperative (agricultural production products).

In accordance with board policy, the Association pays directors honoraria ranging from \$200 to \$600, for attendance at meetings, committee meetings, conference call meetings, or special assignments. Directors are paid a monthly retainer fee of \$200, except for the chairman of the board who receives \$375 and the chairmen of the Audit, Legislative, and

Governance committees who receive \$225. Total compensation paid to directors as a group was \$151,750 for 2019. No director received more than \$5,000 in non-cash compensation during the year.

The following chart details the number of meetings, other activities and additional compensation paid for other activities (if applicable) for each director:

Name of Director	Days Served		Committees*	Committee Compensation (\$)
	Regular Board Meetings	Committee Meetings		
John F. Davis <i>Chairman</i>	6	4	Audit	\$2,400
		1	Governance	600
		1	Compensation	600
		11	Other Activities	3,400
A. Kevin Monahan <i>Vice-Chairman</i>	4	1	Compensation	600
		2	Governance	1,200
		1	Other Activities	200
John E Bickford <i>Appointed Stockholder Director</i>	5	1	Compensation	600
		2	Governance	1,200
		4	Other Activities	800
R. Bertsch Cox <i>Appointed Director</i>	4	4	Audit	2,400
		1	Compensation	600
		9	Other Activities	3,800
Jennifer U. Cuthbertson, <i>Appointed Director</i>	6	4	Audit	2,400

		9	Other Activities	3,000
Steven H. Walter	5	1	Other Activities	200
Robert R. Womack	3	4	Other Activities	2,000

*Some committee meetings may be scheduled on the same day as other meetings, resulting in no additional compensation

Directors are reimbursed on an actual cost basis for all expenses incurred in the performance of official duties. Such expenses may include transportation, lodging, meals, tips, tolls, parking, laundry, registration fees, and other expenses associated with travel on official business. A copy of the policy is available to shareholders of the Association upon request.

The aggregate amount of reimbursement for travel, subsistence and other related expenses for all directors as a group was \$69,443 for 2019, \$44,722 for 2018, and \$63,936 for 2017.

Transactions with Senior Officers and Directors

The reporting entity’s policies on loans to and transactions with its officers and directors, to be disclosed in this section are incorporated herein by reference to Note 10, *Related Party Transactions*, of the Consolidated Financial Statements included in this Annual Report.

Transactions Other Than Loans

There have been no transactions that occurred at any time during the year ended December 31, 2019 or in aggregate, between the Association and senior officers or directors, their immediate family members or any organizations with which they are affiliated, which exceed \$5,000. There were no transactions with any senior officer or director related to the purchase or retirement of preferred stock of the Association for the year ended December 31, 2019.

Involvement in Certain Legal Proceedings

There were no other matters which came to the attention of management or the board of directors regarding involvement of current directors or senior officers in specified legal proceedings which should be disclosed in this section. No directors or senior officers have been involved in any legal proceedings during the last five years which require reporting per FCA regulations.

Relationship with Independent Auditors

There were no changes in or material disagreements with our independent auditors on any matter of accounting principles or financial statement disclosure during this period.

Aggregate fees paid by the Association for services rendered by its independent auditors for the year ended December 31, 2019 were as follows:

	2019
<i>Independent Auditors</i>	
PricewaterhouseCoopers LLP	
Audit services	\$ 94,614
Total	\$ 94,614

Audit fees were for the annual audit of the consolidated financial statements.

Consolidated Financial Statements

The consolidated financial statements, together with the report thereon of PricewaterhouseCoopers LLP dated March 13, 2019 and the report of management, which appear in this Annual Report are incorporated herein by reference. Copies of the Association’s Annual and unaudited Quarterly reports are available upon request free of charge by calling (804) 746-1252, writing Diane Fowlkes, Chief Financial Officer, Colonial Farm Credit, ACA, 7104 Mechanicsville Turnpike, Mechanicsville, VA 23111, or accessing the website, www.colonialfarmcredit.com. The Association prepares an electronic version of the Annual Report which is available on the Association’s website within 75 days after the end of the fiscal year. The Association prepares an electronic version of the Quarterly report within 40 days after the end of each fiscal quarter, except that no report need be prepared for the fiscal

quarter that coincides with the end of the fiscal year of the institution.

Borrower Information Regulations

Since 1972, Farm Credit Administration (FCA) regulations have required that borrower information be held in strict confidence by Farm Credit System (FCS) institutions, their directors, officers and employees. These regulations provide Farm Credit institutions clear guidelines for protecting their borrowers’ nonpublic personal information.

On November 10, 1999, the FCA Board adopted a policy that requires FCS institutions to formally inform new borrowers at loan closing of the FCA regulations on releasing borrower information and to address this information in the Annual Report. The implementation of these measures ensures that new and existing borrowers are aware of the privacy protections afforded them through FCA regulations and Farm Credit System institution efforts.

Credit and Services to Young, Beginning, and Small Farmers and Ranchers and Producers or Harvesters of Aquatic Products

Information to be disclosed in this section is incorporated herein by reference to the similarly named section in the Management’s Discussion and Analysis of Financial Condition and Results of Operations section included in this annual report to the shareholders.

Shareholder Investment

Shareholder investment in the Association could be materially affected by the financial condition and results of operations of AgFirst Farm Credit Bank (Bank or AgFirst). Copies of the Bank’s Annual and Quarterly reports are available upon request free of charge by calling 1-800-845-1745, ext. 2832, or writing Susanne Caughman, AgFirst Farm Credit Bank, P.O. Box 1499, Columbia, SC 29202. Information concerning AgFirst Farm Credit Bank can also be obtained by going to AgFirst’s website at www.agfirst.com. The Bank prepares an electronic version of the Annual Report, which is available on the website, within 75 days after the end of the fiscal year and distributes the Annual Reports to shareholders within 90 days after the end of the fiscal year. The Bank prepares an electronic version of the Quarterly report, which is available on the Bank’s website, within 40 days after the end of each fiscal quarter, except that no report needs to be prepared for the fiscal quarter that coincides with the end of the fiscal year of the Bank.

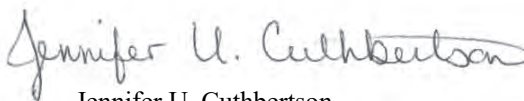

Report of the Audit Committee

The Audit Committee of the Board of Directors (Committee) is comprised of the directors named below. None of the directors who serve on the Committee is an employee of Colonial Farm Credit, ACA (Association) and in the opinion of the Board of Directors; each is free of any relationship with the Association or management that would interfere with the director's independent judgment on the Committee.

The Committee has adopted a written charter that has been approved by the Board of Directors. The Committee has reviewed and discussed the Association's audited financial statements with management, which has primary responsibility for the financial statements.

PricewaterhouseCoopers LLP (PwC), the Association's independent auditors for 2019, is responsible for expressing an opinion on the conformity of the Association's audited financial statements with accounting principles generally accepted in the United States of America. The Committee has discussed with PwC the matters that are required to be discussed by Statement on Auditing Standards No. 114 (*The Auditor's Communication With Those Charged With Governance*). The Committee discussed with PwC its independence from Colonial Farm Credit, ACA. The Committee also reviewed the non-audit services provided by PwC and concluded that these services were not incompatible with maintaining PwC's independence.

Based on the considerations referred to above, the Committee recommended to the Board of Directors that the audited financial statements be included in the Association's Annual Report for 2019. The foregoing report is provided by the following independent directors, who constitute the Committee:

Jennifer U. Cuthbertson
Chairperson of the Audit Committee

Members of Audit Committee

R. Bertsch Cox
Clarke E. Fox
Hugh S. Jones
Robert M. Jones
Frankie R. Large
John N. Mills, Jr.
Paul W. Rogers, Jr.

March 12, 2020

Report of Independent Auditors

To the Board of Directors and Management of Colonial Farm Credit, ACA

We have audited the accompanying consolidated financial statements of Colonial Farm Credit, ACA and its subsidiaries (the "Association"), which comprise the consolidated balance sheets as of December 31, 2019, 2018 and 2017, and the related consolidated statements of income, of comprehensive income, of changes in members' equity and of cash flows for the years then ended.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on the consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the Association's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Association's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Colonial Farm Credit, ACA and its subsidiaries as of December 31, 2019, 2018 and 2017, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

PricewaterhouseCoopers LLP

Notes to the Consolidated Financial Statements

(dollars in thousands, except as noted)

Note 1 — Organization and Operations

A. **Organization:** Colonial Farm Credit, ACA (Association) is a member-owned cooperative that provides credit and credit-related services to qualified borrowers in the counties of Amelia, Amherst, Appomattox, Brunswick, Buckingham, Campbell, Caroline, Charles City, Charlotte, Chesterfield, Cumberland, Dinwiddie, Essex, Fluvanna, Gloucester, Goochland, Greensville, Hanover, Henrico, Isle of Wight, King and Queen, King George, King William, James City, Lancaster, Louisa, Lunenburg, Mathews, Mecklenburg, Middlesex, New Kent, Northumberland, Nottoway, Powhatan, Prince Edward, Prince George, Richmond, Southampton, Surry, Sussex, Westmoreland, York, and the cities of Chesapeake, Newport News, Suffolk and Virginia Beach in the state of Virginia and the counties of Anne Arundel, Calvert, Charles, Prince George's and Saint Mary's in the state of Maryland.

The Association is a lending institution in the Farm Credit System (System), a nationwide network of cooperatively owned banks and associations. It was established by Acts of Congress and is subject to the provisions of the Farm Credit Act of 1971, as amended (Farm Credit Act). The System specializes in providing financing and related services to qualified borrowers for agricultural and rural purposes.

The nation is served by three Farm Credit Banks (FCBs) and one Agricultural Credit Bank (ACB), (collectively, the System Banks) each of which has specific lending authorities within its chartered territory. The ACB also has additional specific nationwide lending authorities.

Each System Bank serves one or more Agricultural Credit Associations (ACAs) that originate long-term, short-term and intermediate-term loans, Production Credit Associations (PCAs) that originate and service short- and intermediate-term loans, and/or Federal Land Credit Associations (FLCAs) that originate and service long-term real estate mortgage loans. These associations borrow a majority of the funds for their lending activities from their related bank. System Banks are also responsible for supervising the activities of associations within their districts. AgFirst (Bank) and its related associations (Associations or District Associations) are collectively referred to as the AgFirst District. The District Associations jointly own substantially all of AgFirst's voting stock. As of year-end, the District consisted of the Bank and nineteen District Associations. All nineteen were structured as ACA holding companies, with PCA and FLCA subsidiaries. FLCAs are tax-exempt while ACAs and PCAs are taxable.

The Farm Credit Administration (FCA) is delegated authority by Congress to regulate the System banks and associations. The FCA examines the activities of the

associations and certain actions by the associations are subject to the prior approval of the FCA and the supervising bank.

The Farm Credit Act also established the Farm Credit System Insurance Corporation (Insurance Corporation) to administer the Farm Credit Insurance Fund (Insurance Fund). The Insurance Fund is required to be used (1) to ensure the timely payment of principal and interest on Systemwide debt obligations (Insured Debt), (2) to ensure the retirement of protected borrower capital at par or stated value, and (3) for other specified purposes. The Insurance Fund is also available for discretionary uses by the Insurance Corporation to provide assistance to certain troubled System institutions and to cover the operating expenses of the Insurance Corporation. Each System bank has been required to pay premiums, which may be passed on to the Association, into the Insurance Fund, based on its average adjusted outstanding Insured Debt until the assets in the Insurance Fund reach the "secure base amount." The secure base amount is defined in the Farm Credit Act as 2.0 percent of the aggregate insured obligations (adjusted to reflect the reduced risk on loans or investments guaranteed by federal or state governments) or such other percentage of the aggregate obligations as the Insurance Corporation at its sole discretion determines to be actuarially sound. When the amount in the Insurance Fund exceeds the secure base amount, the Insurance Corporation is required to reduce premiums and may return excess funds above the secure base amount to System institutions. However, it must still ensure that reduced premiums are sufficient to maintain the level of the Insurance Fund at the secure base amount.

B. **Operations:** The Farm Credit Act sets forth the types of authorized lending activity and financial services that can be offered by the Association, and the persons eligible to borrow.

The Associations borrow from the Bank and in turn may originate and service short- and intermediate-term loans to their members, as well as long-term real estate mortgage loans.

The Bank primarily lends to the District Associations in the form of a line of credit to fund the Associations' earning assets. These lines of credit (or Direct Notes) are collateralized by a pledge of substantially all of each Association's assets. The terms of the Direct Notes are governed by a General Financing Agreement (GFA) between the Bank and Association. Each advance is structured such that the principal cash flow, repricing characteristics, and underlying index (if any) of the advance match those of the assets being funded. By match-funding the Association loans, the Associations' exposure to interest rate risk is minimized.

In addition to providing funding for earning assets, the Bank provides District Associations with banking and

support services such as accounting, human resources, information systems, and marketing. The costs of these support services are included in the cost of the Direct Note, or in some cases billed directly to certain Associations that use a specific service.

The Association is authorized to provide, either directly or in participation with other lenders, credit, credit commitments, and related services to eligible borrowers. Eligible borrowers include farmers, ranchers, producers or harvesters of aquatic products, rural residents, and farm-related businesses.

The Association may sell to any System borrowing member, on an optional basis, credit or term life insurance appropriate to protect the loan commitment in the event of death of the debtor(s). The sale of other insurance necessary to protect a member's farm or aquatic unit is permitted, but limited to hail and multi-peril crop insurance, and insurance necessary to protect the facilities and equipment of aquatic borrowers.

Note 2 — Summary of Significant Accounting Policies

The accounting and reporting policies of the Association conform with accounting principles generally accepted in the United States of America (GAAP) and prevailing practices within the banking industry. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the Consolidated Financial Statements and accompanying notes. Significant estimates are discussed in these footnotes, as applicable. Actual results may differ from these estimates.

The accompanying consolidated financial statements include the accounts of the ACA, PCA and FLCA.

Certain amounts in the prior year financial statements may have been reclassified to conform to the current period presentation. Such reclassifications had no effect on net income or total members' equity of prior years.

- A. **Cash:** Cash represents cash on hand and on deposit at banks. At the most recent year-end, the Association held \$22 in cash in excess of insured amounts.
- B. **Loans and Allowance for Loan Losses:** The Association is authorized to make long-term real estate loans with maturities of 5 to 40 years and certain short- and intermediate-term loans for agricultural production or operating purposes with maturities of not more than 10 years.

Loans are carried at their principal amount outstanding adjusted for charge-offs, premiums, discounts, deferred loan fees or costs, and derivative instruments and hedging valuation adjustments, if any. Interest on loans is accrued and credited to interest income based upon the daily principal amount outstanding. The difference in the total investment in a loan and its principal amount may be deferred as part of the carrying amount of the loan and the net difference amortized over the life of the related loan as

an adjustment to interest income using the effective interest method.

Impaired loans are loans for which it is probable that all principal and interest will not be collected according to the contractual terms of the loan and are generally considered substandard or doubtful, which is in accordance with the loan rating model, as described below. Impaired loans include nonaccrual loans, restructured loans, and loans past due 90 days or more and still accruing interest. A loan is considered contractually past due when any principal repayment or interest payment required by the loan instrument is not received on or before the due date. A loan remains contractually past due until the entire amount past due, including principal, accrued interest, and penalty interest incurred as the result of past due status, is collected or otherwise discharged in full. A formal restructuring may also cure a past due status.

Loans are generally classified as nonaccrual when principal or interest is delinquent for 90 days (unless adequately collateralized and in the process of collection) or circumstances indicate that collection of principal and/or interest is in doubt. When a loan is placed in nonaccrual status, accrued interest deemed uncollectible is reversed (if accrued in the current year) or charged against the allowance for loan losses (if accrued in the prior year).

When loans are in nonaccrual status, payments are applied against the recorded investment in the loan asset. If collection of the recorded investment in the loan is fully expected and the loan does not have a remaining unrecovered prior charge-off associated with it, the interest portion of payments received in cash may be recognized as interest income. Nonaccrual loans may be returned to accrual status when principal and interest are current, prior charge-offs have been recovered, the ability of the borrower to fulfill the contractual repayment terms is fully expected, and the loan is not classified "doubtful" or "loss." Loans are charged off at the time they are determined to be uncollectible.

In cases where the Association makes certain monetary concessions to the borrower through modifications to the contractual terms of the loan, the loan is classified as a restructured loan. A restructured loan constitutes a troubled debt restructuring (TDR) if for economic or legal reasons related to the debtor's financial difficulties the Association grants a concession to the debtor that it would not otherwise consider. If the borrower's ability to meet the revised payment schedule is uncertain, the loan is classified as a nonaccrual loan.

The allowance for loan losses is maintained at a level considered adequate by management to provide for probable and estimable losses inherent in the loan portfolio as of the report date. The allowance for loan losses is increased through provisions for loan losses and loan recoveries and is decreased through loan charge-offs and allowance reversals. A review of individual loans in each respective portfolio is performed periodically to determine the appropriateness of risk ratings and to ensure loss exposure to the Association has been identified. The allowance for loan losses is a valuation account used to

reasonably estimate loan losses as of the financial statement date. Determining the appropriate allowance for loan losses balance involves significant judgment about when a loss has been incurred and the amount of that loss.

The Association considers the following factors, among others, when determining the allowance for loan losses:

- Changes in credit risk classifications
- Changes in collateral values
- Changes in risk concentrations
- Changes in weather-related conditions
- Changes in economic conditions

A specific allowance may be established for impaired loans under Financial Accounting Standards Board (FASB) guidance on accounting by creditors for impairment of a loan. Impairment of these loans is measured based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as practically expedient, at the loan's observable market price or fair value of the collateral if the loan is collateral dependent.

A general allowance may also be established under FASB guidance on accounting for contingencies, to reflect estimated probable credit losses inherent in the remainder of the loan portfolio which excludes impaired loans considered under the specific allowance discussed above. A general allowance can be evaluated on a pool basis for those loans with similar characteristics. The level of the general allowance may be based on management's best estimate of the likelihood of default adjusted for other relevant factors reflecting the current environment.

The credit risk rating methodology is a key component of the Association's allowance for loan losses evaluation, and is generally incorporated into the institution's loan underwriting standards and internal lending limit. The Association uses a two-dimensional loan rating model based on internally generated combined system risk rating guidance that incorporates a 14-point risk rating scale to identify and track the probability of borrower default and a separate scale addressing loss given default over a period of time. Probability of default is the probability that a borrower will experience a default within 12 months from the date of the determination of the risk rating. A default is considered to have occurred if the lender believes the borrower will not be able to pay its obligation in full or the borrower is past due more than 90 days. The loss given default is management's estimate as to the anticipated economic loss on a specific loan assuming default has occurred or is expected to occur within the next 12 months.

Each of the ratings carries a distinct percentage of default probability. The 14-point risk rating scale provides for granularity of the probability of default, especially in the acceptable ratings. There are nine acceptable categories that range from a borrower of the highest quality to a borrower of minimally acceptable quality. The probability of default between 1 and 9 is very narrow and would reflect almost no default to a minimal default percentage. The probability of default grows significantly as a loan moves from a 9 to 10 (other assets especially mentioned) and grows more significantly as a loan moves to a substandard

viable level of 11. A substandard non-viable rating of 12 indicates that the probability of default is almost certain. Loans risk rated 13 or 14 are generally written off.

C. **Loans Held for Sale:** Loans are classified as held for sale when there is intent to sell the loans within a reasonable period of time. Loans intended for sale are carried at the lower of cost or fair value.

D. **Other Property Owned (OPO):** Other property owned, consisting of real estate, personal property, and other assets acquired through a collection action, is recorded upon acquisition at fair value less estimated selling costs. Any initial reduction in the carrying amount of a loan to the fair value of the collateral received is charged to the allowance for loan losses. Revised estimates to the fair value less cost to sell are reported as adjustments to the carrying amount of the asset, provided that such adjusted value is not in excess of the carrying amount at acquisition. Income, expenses, and carrying value adjustments related to other property owned are included in Gains (Losses) on Other Property Owned, Net in the Consolidated Statements of Income.

E. **Premises and Equipment:** Land is carried at cost. Premises and equipment are carried at cost less accumulated depreciation. Depreciation is provided on the straight-line method over the estimated useful lives of the assets. Gains and losses on dispositions are reflected in current earnings. Maintenance and repairs are charged to expense and improvements are capitalized. Premises and equipment are evaluated for impairment whenever events or circumstances indicate that the carrying value of the asset may not be recoverable.

From time to time, assets classified as premises and equipment are transferred to held for sale for various reasons. These assets are carried in Other Assets at the lower of the recorded investment in the asset or fair value less estimated cost to sell based upon the property's appraised value at the date of transfer. Any write-down of property held for sale is recorded as a loss in the period identified.

F. **Investments:** The Association may hold investments as described below.

Equity Investments in Other Farm Credit System Institutions

Investments in other Farm Credit System institutions are generally nonmarketable investments consisting of stock and participation certificates, allocated surplus, and reciprocal investments in other institutions regulated by the FCA. These investments are carried at cost and evaluated for impairment based on the ultimate recoverability of the par value rather than by recognizing temporary declines in value.

Other Investments

As discussed in Note 8, certain investments, consisting primarily of mutual funds, are held in trust and investment accounts and are reported at fair value. Holding period gains and losses are included within Noninterest Income on the Consolidated Statements of Income and the balance of

these investments is included in Other Assets on the accompanying Consolidated Balance Sheet.

Investment Income

Dividends from Investments in Other Farm Credit Institutions are generally recorded as patronage income and included in Noninterest Income.

G. Voluntary Advance Conditional Payments: The Association is authorized under the Farm Credit Act to accept advance payments from borrowers. To the extent the borrower's access to such advance payments is restricted; the advanced conditional payments are netted against the borrower's related loan balance. Amounts in excess of the related loan balance and amounts to which the borrower has unrestricted access are presented as other liabilities in the accompanying Consolidated Balance Sheets. Advanced conditional payments are not insured. Interest is generally paid by the Association on such accounts.

H. Employee Benefit Plans: The Association participates in District and multi-district sponsored benefit plans. These plans may include defined benefit final average pay retirement, defined benefit cash balance retirement, defined benefit other postretirement benefits, and defined contribution plans.

Defined Contribution Plans

Substantially all employees are eligible to participate in the defined contribution Farm Credit Benefit Alliance (FCBA) 401(k) Plan, subsequently referred to as the 401(k) Plan, which qualifies as a 401(k) plan as defined by the Internal Revenue Code. Employee deferrals are not to exceed the maximum deferral as determined and adjusted by the Internal Revenue Service. Company contributions to the 401(k) Plan are expensed as funded.

The Association also offers a FCBA supplemental 401(k) plan for certain key employees. This plan is nonqualified. Company contributions are expensed as funded.

Additional information may be found in Note 9.

Multiemployer Defined Benefit Plans

Substantially all employees hired before January 1, 2003 may participate in the AgFirst Farm Credit Retirement Plan (Plan), which is a defined benefit plan and considered multiemployer under FASB accounting guidance. The Plan is noncontributory and includes eligible Association and District employees. The "Projected Unit Credit" actuarial method is used for financial reporting purposes.

In addition to pension benefits, the Association provides certain health care and life insurance benefits for retired employees (other postretirement benefits) through a multi-district sponsored retiree healthcare plan. Substantially all employees are eligible for those benefits when they reach early retirement age while working for the Association. Authoritative accounting guidance requires the accrual of the expected cost of providing these benefits to an employee, their beneficiaries and covered dependents during the years the employee renders service necessary to become eligible for benefits.

Since the foregoing plans are multiemployer, the Association does not apply the provisions of FASB guidance on employers' accounting for defined benefit pension and other postretirement plans in its stand-alone financial statements. Rather, the effects of this guidance are reflected in the Annual Information Statement of the Farm Credit System.

Additional information may be found in Note 9 and in the Notes to the Annual Information Statement of the Farm Credit System.

Single Employer Defined Benefit Plan

The Association also sponsors a single employer defined benefit supplemental retirement plan for certain key employees. This plan is nonqualified; therefore, the associated liabilities are included in the Association's Consolidated Balance Sheets in Other Liabilities.

The foregoing defined benefit plan is considered single employer, therefore the Association applies the provisions of FASB guidance on employers' accounting for defined benefit pension and other postretirement plans in its stand-alone financial statements. See Note 9 for additional information.

I. Income Taxes: The Association evaluates tax positions taken in previous and current years according to FASB guidance. A tax position can result in a permanent reduction of income taxes payable, a deferral of income taxes otherwise currently payable to future years, or a change in the expected realizability of deferred tax assets. The term tax position also encompasses, but is not limited to, an entity's status, including its status as a pass-through entity or tax-exempt entity.

The Association is generally subject to Federal and certain other income taxes. As previously described, the ACA holding company has two wholly-owned subsidiaries, a PCA and a FLCA. The FLCA subsidiary is exempt from federal and state income taxes as provided in the Farm Credit Act. The ACA holding company and the PCA subsidiary are subject to federal, state and certain other income taxes.

The Association is eligible to operate as a cooperative that qualifies for tax treatment under Subchapter T of the Internal Revenue Code. Accordingly, under specified conditions, the Association can exclude from taxable income amounts distributed as qualified patronage refunds in the form of cash, stock or allocated surplus. Provisions for income taxes are made only on those taxable earnings that will not be distributed as qualified patronage refunds. The Association distributes patronage on the basis of book income.

The Association accounts for income taxes under the asset and liability method, recognizing deferred tax assets and liabilities for the expected future tax consequences of the temporary differences between the carrying amounts and tax bases of assets and liabilities. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be realized or settled.

The Association records a valuation allowance at the balance sheet dates against that portion of the Association's deferred tax assets that based on management's best estimates of future events and circumstances, more likely than not (a likelihood of more than 50 percent) will not be realized. The consideration of valuation allowances involves various estimates and assumptions as to future taxable earnings, including the effects of the expected patronage program, which reduces taxable earnings.

- J. **Due from AgFirst Farm Credit Bank:** The Association records patronage refunds from the Bank and certain District Associations on an accrual basis.
- K. **Valuation Methodologies:** FASB guidance defines fair value as the exchange price that would be received for an asset or paid to transfer a liability in an orderly transaction between market participants in the principal or most advantageous market for the asset or liability. This guidance also establishes a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. It prescribes three levels of inputs that may be used to measure fair value.

Level 1 inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets.

Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets; quoted prices in markets that are not active; and inputs that are observable, or can be corroborated, for substantially the full term of the asset or liability.

Level 3 inputs to the valuation methodology are unobservable and supported by little or no market activity. Valuation is determined using pricing models, discounted cash flow methodologies, or similar techniques, and could include significant management judgment or estimation. Level 3 assets and liabilities also could include instruments whose price has been adjusted based on dealer quoted pricing that is different than a third-party valuation or internal model pricing.

The Association may use the Bank, internal resources or third parties to obtain fair value prices. Quoted market prices are generally used when estimating fair values of any assets or liabilities for which observable, active markets exist.

A number of methodologies may be employed to value items for which an observable active market does not exist. Examples of these items include: impaired loans, other property owned, and certain derivatives, investment securities and other financial instruments. Inputs to these valuations can involve estimates and assumptions that require a substantial degree of judgment. Some of the assumptions used include, among others, discount rates, rates of return on assets, repayment rates, cash flows, default rates, costs of servicing, and liquidation values. The use of different assumptions could produce significantly different asset or liability values, which could have material positive or negative effects on results of operations.

Additional information may be found in Note 8.

- L. **Off-Balance-Sheet Credit Exposures:** The credit risk associated with commitments to extend credit and letters of credit is essentially the same as that involved with extending loans to customers and is subject to normal credit policies. Collateral may be obtained based on management's assessment of the customer's creditworthiness.

Commitments to extend credit are agreements to lend to customers, generally having fixed expiration dates or other termination clauses that may require payment of a fee.

Letters of credit are commitments issued to guarantee the performance of a customer to a third party. These letters of credit are issued to facilitate commerce and typically result in the commitment being funded when the underlying transaction is consummated between the customer and third party.

- M. **Revenue Recognition:** The Association generates income from multiple sources.

Financial Instruments

The largest source of revenue for the Association is interest income. Interest income is recognized on an accrual basis driven by nondiscretionary formulas based on written contracts, such as loan agreements or securities contracts. Credit-related fees, including letter of credit fees, finance charges and other fees are recognized in Noninterest Income when earned. Other types of noninterest revenues, such as service charges, professional services and broker fees, are accrued and recognized into income as services are provided and the amount of fees earned is reasonably determinable.

Contracts with Customers

The Association maintains contracts with customers to provide support services in various areas such as accounting, lending transactions, consulting, insurance, and information technology. As most of the contracts are to provide access to expertise or system capacity that the Association maintains, there are no material incremental costs to fulfill these contracts that should be capitalized. The Association also does not generally incur costs to obtain contracts. Revenue is recognized to reflect the transfer of goods and services to customers in an amount equal to the consideration the Association receives or expects to receive.

Gains and Losses from Nonfinancial Assets

Any gains or losses on sales of Premises and Equipment and OPO are included as part of Noninterest Income. These gains and losses are recognized, and the nonfinancial asset is derecognized, when the Association has entered into a valid contract with a noncustomer and transferred control of the asset. If the criteria to meet the definition of a contract have not been met, the Association does not derecognize the nonfinancial asset and any consideration received is recognized as a liability. If the criteria for a contract are subsequently met, or if the consideration received is or becomes nonrefundable, a gain or loss may be recognized at that time.

N. Leases:**Lessee**

Contracts entered into are evaluated at inception to determine if they contain a lease. Assets and liabilities are recognized on the Consolidated Balance Sheets to reflect the rights and obligations created by any contracts that do. These contracts are then classified as either operating or finance leases.

In the course of normal operations, the Association may enter into leases for various business purposes. Generally, leases are for terms of three to five years and may include options to extend or terminate the arrangement. Any options are assessed individually to determine if it is reasonably certain they will be exercised.

Right-of-use (ROU) assets represent the right to use an underlying asset for the lease term, and lease liabilities represent the obligation to make the payments arising from the lease. ROU assets and lease liabilities are initially recognized based on the present value of lease payments over the lease term. Lease expense for operating leases is recognized on a straight-line basis over the lease term. Lease expense for finance leases is recognized on a declining basis over the lease term.

ROU assets are included on the Consolidated Balance Sheets in Premises and Equipment for finance leases and Other Assets for operating leases. Lease liabilities are included in Other Liabilities on the Consolidated Balance Sheets. Leases with an initial term of 12 months or less are not recorded on the Consolidated Balance Sheets and lease expense is recognized over the lease term.

Lessor

The Association acts as lessor in certain contractual arrangements. The contracts relate to office space in an owned property and are considered operating leases. Generally, leases are for terms of three to five years and may include options to extend or terminate the arrangement.

Lease income is recognized on a straight-line basis over the lease term. Lease and nonlease components are accounted for separately in the Consolidated Statements of Income. Any initial direct costs are deferred and recognized as an expense over the lease term on the same basis as lease income. Any taxes assessed by a governmental authority are excluded from consideration as variable payments.

Lease receivables and income are included in Accounts Receivable on the Consolidated Balance Sheets and Lease Income in the Consolidated Statements of Income.

- O. Accounting Standards Updates (ASUs):** In January 2020, the FASB issued ASU 2020-01 Investments—Equity Securities (Topic 321), Investments—Equity Method and Joint Ventures (Topic 323), and Derivatives and Hedging (Topic 815): Clarifying the Interactions between Topic 321, Topic 323, and Topic 815. The amendments clarify certain interactions between the guidance on accounting for certain equity securities under Topic 321, the guidance on accounting for investments under the equity method in Topic 323, and the guidance in Topic 815. The Update

could change how an entity accounts for an equity security under the measurement alternative or a forward contract or purchased option to purchase securities that, upon settlement of the forward contract or exercise of the purchased option, would be accounted for under the equity method of accounting or the fair value option in accordance with Topic 825, Financial Instruments. The amendments are intended to improve current GAAP by reducing diversity in practice and increasing comparability of the accounting for these interactions. For public business entities, the amendments are effective for fiscal years beginning after December 15, 2020, and interim periods within those fiscal years. Early adoption is permitted, including early adoption in an interim period. Evaluation of any possible effects the guidance may have on the statements of financial condition and results of operations is in progress.

In December 2019, the FASB issued ASU 2019-12 Income Taxes (Topic 740): Simplifying the Accounting for Income Taxes. The amendments simplify the accounting for income taxes by removing the following exceptions:

- Exception to the incremental approach for intraperiod tax allocation when there is a loss from continuing operations and income or a gain from other items (for example, discontinued operations or other comprehensive income),
- Exception to the requirement to recognize a deferred tax liability for equity method investments when a foreign subsidiary becomes an equity method investment,
- Exception to the ability not to recognize a deferred tax liability for a foreign subsidiary when a foreign equity method investment becomes a subsidiary, and
- Exception to the general methodology for calculating income taxes in an interim period when a year-to-date loss exceeds the anticipated loss for the year.

The amendments also simplify the accounting for income taxes by doing the following:

- Requiring that an entity recognize a franchise tax (or similar tax) that is partially based on income as an income-based tax and account for any incremental amount incurred as a non-income-based tax,
- Requiring that an entity evaluate when a step up in the tax basis of goodwill should be considered part of the business combination in which the book goodwill was originally recognized and when it should be considered a separate transaction,
- Specifying that an entity is not required to allocate the consolidated amount of current and deferred tax expense to a legal entity that is not subject to tax in its separate financial statements; however, an entity may elect to do so (on an entity-by-entity basis) for a legal entity that is both not subject to tax and disregarded by the taxing authority,
- Requiring that an entity reflect the effect of an enacted change in tax laws or rates in the annual effective tax rate computation in the interim period that includes the enactment date, and
- Making minor codification improvements for income taxes related to employee stock ownership plans and

investments in qualified affordable housing projects accounted for using the equity method.

For public business entities, the amendments in this Update are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2020. Evaluation of any possible effects the guidance may have on the statements of financial condition and results of operations is in progress.

In November 2019, the FASB issued ASU 2019-10 Financial Instruments—Credit Losses (Topic 326), Derivatives and Hedging (Topic 815), and Leases (Topic 842). On the basis of feedback obtained from outreach with stakeholders and monitoring of implementation, the Board has gained a greater understanding about the implementation challenges encountered by all types of entities when adopting a major Update. The challenges are often magnified for private companies, smaller public companies, and not-for-profit organizations. In response to those issues and requests to defer certain major Updates not yet effective for all entities, the Board developed a philosophy to extend and simplify how effective dates are staggered between larger public companies (bucket one) and all other entities (bucket two). Credit Losses guidance in ASU 2016-13 will be effective for all bucket two entities for fiscal years beginning after December 15, 2022, including interim periods within those fiscal years.

In May 2019, the FASB issued ASU 2019-05 Financial Instruments—Credit Losses (Topic 326): Targeted Transition Relief. The amendments in this Update provide entities with an option to irrevocably elect the fair value option applied on an instrument-by-instrument basis for certain financial assets upon the adoption of Topic 326. The fair value option election does not apply to held-to-maturity debt securities. For entities that have not yet adopted the amendments in ASU 2016-13, the effective date and transition methodology for the amendments in this Update are the same as in that update. Evaluation of any possible effects the guidance may have on the statements of financial condition and results of operations is in progress.

In April 2019, the FASB issued ASU 2019-04 Codification Improvements to Topic 326 Financial Instruments—Credit Losses, Topic 815 Derivatives and Hedging, and Topic 825 Financial Instruments. The amendments in this Update clarify, correct, and improve various aspects of the guidance in the following Updates related to financial instruments: ASU 2016-01 Financial Instruments—Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Liabilities, ASU 2016-13 Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments, and ASU 2017-12 Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities. The items addressed generally are not expected to have a significant effect on current accounting practice or to create a significant administrative cost for most entities. For entities that have not yet adopted the amendments in ASU 2016-13, the effective dates and transition requirements for the amendments related to this Update are the same as the effective dates and transition requirements in ASU 2016-13. The transition adjustment includes adjustments made as

a result of an entity developing or amending its accounting policy upon adoption of the amendments in this Update for determining when accrued interest receivables are deemed uncollectible and written off. For entities that have adopted the amendments in ASU 2017-12 as of the issuance date of this Update, the effective date is as of the beginning of the first annual period beginning after the issuance date of this Update. For those entities, early adoption is permitted, including adoption on any date on or after the issuance of this Update. The amendments in this Update related to ASU 2016-01 are effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. Early adoption is permitted in any interim period following the issuance of this Update as long as the entity has adopted all of the amendments in ASU 2016-01. The amendments in this Update should be applied on a modified-retrospective transition basis by means of a cumulative-effect adjustment to the opening retained earnings balance in the statement of financial position as of the date an entity adopted all of the amendments in ASU 2016-01. Adoption of the guidance related to ASU 2016-01 and ASU 2017-12 is not expected to have an impact on the statements of financial condition or results of operations. Evaluation of any possible effects the ASU 2016-13 guidance may have on the statements of financial condition and results of operations is in progress.

In August 2018, the FASB issued ASU 2018-15 Intangibles—Goodwill and Other—Internal-Use Software (Subtopic 350-40): Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract. The amendments align the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software (and hosting arrangements that include an internal use software license). The accounting for the service element of a hosting arrangement that is a service contract is not affected by the amendments in this Update. The guidance is effective for public business entities for fiscal years beginning after December 15, 2019, and interim periods within those fiscal years. Early adoption is permitted, including adoption in any interim period, for all entities. The amendments should be applied either retrospectively or prospectively to all implementation costs incurred after the date of adoption. The guidance will be adopted on a prospective basis in 2020 and is not expected to have a material impact on the statements of financial condition or results of operations.

In August 2018, the FASB issued ASU 2018-13 Disclosure Framework—Changes to the Disclosure Requirements for Fair Value Measurement. The amendments are part of the FASB’s disclosure framework project. The project’s objective and primary focus are to improve the effectiveness of disclosures in the notes to financial statements by facilitating clear communication of the information required by GAAP that is most important to users of each entity’s financial statements. The amendments remove, modify or add certain disclosures contained in the financial statement footnotes related to fair value. Additionally, the guidance is intended to promote the appropriate exercise of discretion by entities when

considering fair value measurement disclosures and to clarify that materiality is an appropriate consideration of entities and their auditors when evaluating disclosure requirements. The amendments are effective for all entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. Certain amendments should be applied prospectively for only the most recent interim or annual period presented in the initial fiscal year of adoption. All other amendments should be applied retrospectively to all periods presented upon their effective date. Early adoption is permitted upon issuance. Entities are permitted to early adopt any removed or modified disclosures upon issuance of this Update and delay adoption of the additional disclosures until their effective date. The removed disclosures were adopted effective with the 2018 Annual Report, and the remaining disclosures were adopted with the 2019 Annual Report.

In February 2018, the FASB issued ASU 2018-02 Income Statement—Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income. The guidance allows a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the Tax Cuts and Jobs Act. The amendments eliminate the stranded tax effects resulting from the Tax Cuts and Jobs Act and are intended to improve the usefulness of information reported to financial statement users. However, because the amendments only relate to the reclassification of the income tax effects of the Tax Cuts and Jobs Act, the underlying guidance that requires that the effect of a change in tax laws or rates be included in income from continuing operations is not affected. The Update also requires certain disclosures about stranded tax effects. The guidance was effective for all entities for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years. Adoption of this guidance had no impact on the statements of financial condition and results of operations.

In March 2017, the FASB issued ASU 2017-08 Receivables—Nonrefundable Fees and Other Costs (Subtopic 310-20): Premium Amortization on Purchased Callable Debt Securities. The guidance relates to certain callable debt securities and shortens the amortization period for any premium to the earliest call date. The Update was effective for interim and annual periods beginning after December 15, 2018 for public business entities. Adoption of this guidance had no impact on the statements of financial condition and results of operations.

In June 2016, the FASB issued ASU 2016-13 Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. This Update, and subsequent clarifying guidance issued, is intended to improve financial reporting by requiring timelier recording of credit losses on financial instruments. It requires an organization to measure all expected credit losses for financial assets held at the reporting date. Financial institutions and other organizations will use forward-looking information to estimate their credit losses. Additionally, the ASU amends the accounting for credit losses on available-for-sale debt securities and purchased financial assets with credit deterioration. For public

companies that are not SEC filers, it will take effect for fiscal years beginning after December 15, 2022, and interim periods within those fiscal years. Early application will be permitted for all organizations for fiscal years, and interim periods within those fiscal years, beginning after December 31, 2018. Evaluation of any possible effects the guidance may have on the statements of financial condition and results of operations is in progress.

In February 2016, the FASB issued ASU 2016-02 Leases (Topic 842). This Update, and subsequent clarifying guidance issued, requires organizations that lease assets to recognize on the balance sheet the assets and liabilities for the rights and obligations created by those leases. Leases are classified as either finance leases or operating leases. This distinction is relevant for the pattern of expense recognition in the income statement. Lessor accounting guidance is largely unchanged from the previous standard. The Update also eliminates leveraged lease accounting but allows existing leveraged leases to continue their current accounting until maturity, termination or modification. The amendments were effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years, for public business entities.

Transition Information

- The guidance was adopted using the optional modified retrospective method and practical expedients for transition. Under this transition method, an entity initially applies the new leases standard at the adoption date and recognizes a cumulative-effect adjustment to the opening balance of retained earnings in the period of adoption.
- The package of practical expedients related to initial application of the guidance was elected, which allowed existing leases to be largely accounted for consistent with current guidance, except for the incremental balance sheet recognition for lessees.
- There will not be a material change to the timing of future expense recognition.
- Upon adoption, a cumulative-effect adjustment to equity of approximately \$(9) was recorded. In addition, a Right of Use Asset in the amount of \$100 and Lease Liability in the amount of \$109 were recognized.
- Given the limited changes to lessor accounting, there were no material changes to recognition or measurement.

Note 3 — Loans and Allowance for Loan Losses

For a description of the Association's accounting for loans, including impaired loans, and the allowance for loan losses, see Note 2 subsection B above.

Credit risk arises from the potential inability of an obligor to meet its repayment obligation which exists in outstanding loans. The Association manages credit risk associated with lending activities through an assessment of the credit risk profile of an individual obligor. The Association sets its own underwriting standards and lending policies that provide direction to loan officers and are approved by the Board of Directors.

The credit risk management process begins with an analysis of the obligor’s credit history, repayment capacity and financial position. Repayment capacity focuses on the obligor’s ability to repay the obligation based on cash flows from operations or other sources of income, including non-farm income. Real estate mortgage loans must be secured by first liens on the real estate collateral. As required by FCA regulations, each institution that makes loans on a secured basis must have collateral evaluation policies and procedures.

The credit risk rating process for loans uses a two-dimensional structure, incorporating a 14-point probability of default scale (see further discussion in Note 2 subsection B above) and a separate scale addressing estimated percentage loss in the event of default. The loan rating structure incorporates borrower risk and transaction risk. Borrower risk is the risk of loss driven by factors intrinsic to the borrower. The transaction risk or facility risk is related to the structure of a credit (tenor, terms, and collateral).

The Association’s loan portfolio, which includes purchased interests in loans, has been segmented by the following loan types as defined by the FCA:

- Real estate mortgage loans — loans made to full-time or part-time farmers secured by first lien real estate mortgages with maturities from five to thirty years. These loans may be made only in amounts up to 85 percent of the appraised value of the property taken as security or up to 97 percent of the appraised value if guaranteed by a federal, state, or other governmental agency. The actual percentage of loan-to-appraised value when loans are made is generally lower than the statutory required percentage.
- Production and intermediate-term loans — loans to full-time or part-time farmers that are not real estate mortgage loans. These loans fund eligible financing needs including operating inputs (such as labor, feed, fertilizer, and repairs), livestock, living expenses, income taxes, machinery or equipment, farm buildings, and other business-related expenses. Production loans may be made

on a secured or unsecured basis and are most often made for a period of time that matches the borrower’s normal production and marketing cycle, which is typically one year or less. Intermediate-term loans are made for a specific term, generally greater than one year and less than or equal to ten years.

- Loans to cooperatives — loans for any cooperative purpose other than for communication, power, and water and waste disposal.
- Processing and marketing loans — loans for operations to process or market the products produced by a farmer, rancher, or producer or harvester of aquatic products, or by a cooperative.
- Farm-related business loans — loans to eligible borrowers that furnish certain farm-related business services to farmers or ranchers that are directly related to their agricultural production.
- Rural residential real estate loans — loans made to individuals, who are not farmers, to purchase a single-family dwelling that will be the primary residence in open country, which may include a town or village that has a population of not more than 2,500 persons. In addition, the loan may be to remodel, improve, or repair a rural home, or to refinance existing debt. These loans are generally secured by a first lien on the property.
- Communication loans — loans primarily to finance rural communication providers.
- Power loans — loans primarily to finance electric generation, transmission and distribution systems serving rural areas.
- Water and waste disposal loans — loans primarily to finance water and waste disposal systems serving rural areas.
- International loans — primarily loans or credit enhancements to other banks to support the export of U.S. agricultural commodities or supplies. The federal government guarantees a substantial portion of these loans.
- Lease receivables — the net investment for all finance leases such as direct financing leases, leveraged leases, and sales-type leases.

A summary of loans outstanding at period end follows:

	December 31,		
	2019	2018	2017
Real estate mortgage	\$ 435,210	\$ 422,749	\$ 397,457
Production and intermediate-term	171,757	172,996	168,323
Loans to cooperatives	4,278	4,803	6,797
Processing and marketing	18,672	22,008	16,466
Farm-related business	5,730	5,483	5,868
Communication	578	513	602
Power and water/waste disposal	2,215	2,433	3,039
Rural residential real estate	35,455	36,287	34,572
International	3,306	2,997	2,995
Total loans	<u>\$ 677,201</u>	<u>\$ 670,269</u>	<u>\$ 636,119</u>

A substantial portion of the Association’s lending activities is collateralized and the Association’s exposure to credit loss associated with lending activities is reduced accordingly.

The amount of collateral obtained, if deemed necessary upon extension of credit, is based on management’s credit evaluation of the borrower. Collateral held varies, but typically includes farmland and income-producing property, such as crops and livestock, as well as receivables. Long-term real estate loans are collateralized by the first liens on the underlying real property. Federal regulations state that long-term real estate loans are not to exceed 85 percent (97 percent if guaranteed by a government agency) of the property’s appraised

value. However, a decline in a property's market value subsequent to loan origination or advances, or other actions necessary to protect the financial interest of the Association in the collateral, may result in loan to value ratios in excess of the regulatory maximum.

The Association may purchase or sell participation interests with other parties in order to diversify risk, manage loan volume, and comply with FCA regulations. The following tables present the principal balance of participation loans at periods ended:

December 31, 2019

*Includes the loan types: Loans to cooperatives, Processing and marketing, and Farm-related business.

A restructuring of a debt constitutes a troubled debt restructuring (TDR) if the creditor for economic or legal reasons related to the debtor's financial difficulties grants a concession to the debtor that it would not otherwise consider. The following tables present additional information about pre-modification and post-modification outstanding recorded investment and the effects of the modifications that occurred during the periods presented.

Outstanding Recorded Investment	Year Ended December 31, 2019					Charge-offs

Interest concessions may include interest forgiveness and interest deferment. Principal concessions may include principal forgiveness, principal deferment, and maturity extension. Other concessions may include additional compensation received which might be in the form of cash or other assets.

There were no TDRs that occurred during the previous twelve months and for which there was a subsequent payment default during the periods presented. Payment default is defined as a payment that was thirty days or more past due.

The following table provides information at period end on outstanding loans restructured in troubled debt restructurings. These loans are included as impaired loans in the impaired loan table:

	Total TDRs			Nonaccrual TDRs		
	December 31,			December 31,		
	2019	2018	2017	2019	2018	2017
Real estate mortgage	\$ 686	\$ 755	\$ 753	\$ 285	\$ 331	\$ 307

Total loans	\$ 1,011	\$ 1,126	\$ 2,881	\$ 568	\$ 651	\$ 2,375
Additional commitments to lend	\$ -	\$ -	\$ -			

The Association had no foreclosed residential real estate properties held as a result of obtaining physical possession and no consumer mortgage loans secured by residential real estate for which formal foreclosure proceeding were in process at December 31, 2019.

Note 4 — Investments

Equity Investments in Other Farm Credit Institutions

Equity investments in other Farm Credit System institutions are generally nonmarketable investments consisting of stock and participation certificates, allocated surplus, and reciprocal investments in other institutions regulated by the FCA. These investments are carried at cost and evaluated for impairment based on the ultimate recoverability of the par value rather than by recognizing temporary declines in value.

The Association is required to maintain ownership in the Bank in the form of Class B or Class C stock as determined by the Bank. The Bank may require additional capital contributions to maintain its capital requirements. The Association's investment in the Bank totaled \$6,652 for 2019, \$6,382 for 2018 and \$6,448 for 2017. The Association owned 2.35 percent of the issued stock of the Bank as of December 31, 2019, net of any reciprocal investment. As of that date, the Bank's assets totaled \$34.5 billion and shareholders' equity totaled \$2.3 billion. The Bank's earnings were \$272 million for 2019. In addition, the Association had investments of \$414 related to other Farm Credit institutions at December 31, 2019.

Note 5 — Real Estate and Other Property

Premises and Equipment

Premises and equipment consists of the following:

	December 31,		
	2019	2018	2017
Land	\$ 427	\$ 481	\$ 481
Buildings and improvements	2,462	2,323	2,305
Furniture and equipment	2,331	2,291	2,147
	5,220	5,095	4,933
Less: accumulated depreciation	3,285	3,214	3,225
Total	\$ 1,935	\$ 1,881	\$ 1,708

Other Property Owned

Net (gains) losses on other property owned consist of the following:

	December 31,		
	2019	2018	2017
(Gains) losses on sale, net	\$ (8)	\$ -	\$ (1)
Carrying value unrealized (gains) losses	(5)	-	22
Operating (income) expense, net	17	3	1
(Gains) losses on other property owned, net	\$ 4	\$ 3	\$ 22

Gains on sales of other property owned were deferred if the sales involved financing from the Association and did not meet the criteria for immediate recognition. There were no deferred gains at December 31, 2019, 2018, and 2017.

Note 6 — Debt

Notes Payable to AgFirst Farm Credit Bank

Under the Farm Credit Act, the Association is obligated to borrow only from the Bank, unless the Bank approves borrowing from other funding sources. The borrowing relationship is established with the Bank through a General Financing Agreement (GFA). The GFA utilizes the Association's credit and fiscal performance as criteria for establishing a line of credit on which the Association may draw funds. The GFA has a one year term which expires on December 31 and is renewable each year. The Association has no reason to believe the GFA will not be renewed upon expiration. The Bank, consistent with FCA regulations, has established limitations on the Association's ability to borrow funds based on specified factors or formulas relating primarily to credit quality and financial condition. At December 31, 2019, the Association's notes payable were within the specified limitations.

The Association's indebtedness to the Bank represents borrowings by the Association to fund its earning assets. This indebtedness is collateralized by a pledge of substantially all of the Association's assets and the terms of the revolving lines of credit are governed by the GFA. Interest rates on both variable and fixed rate advances are generally established loan-by-loan, based on the Bank's marginal cost of funds, capital position, operating costs and return objectives. In the event of prepayment of any portion of a fixed rate advance, the Association may incur a prepayment penalty in accordance with the terms of the GFA, which will be included in interest expense. The interest rate is periodically adjusted by the Bank based upon an agreement between the Bank and the Association.

The weighted average interest rates on the variable rate advances were 2.77 percent for LIBOR-based loans and 2.91 percent for Prime-based loans, and the weighted average remaining maturities were 4.0 years and 0.5 years, respectively, at December 31, 2019. The weighted-average interest rate on the fixed rate and adjustable rate mortgage (ARM) loans which are match funded by the Bank was 3.47 percent, and the weighted average remaining maturity was 12.4 years at December 31, 2019. The weighted-average interest rate on all interest-bearing notes payable was 3.35 percent and the weighted-average remaining maturity was 10.3 years at December 31, 2019. Gross notes payable consists of approximately 19.60 percent variable rate and 80.40 percent fixed rate portions, representing a match-funding of the Association's loan volume at December 31, 2019. Notes payable to AgFirst Farm Credit Bank, as reflected on the Consolidated Balance Sheets, also includes a credit which reduces the notes payable balance and corresponding interest expense. The weighted average maturities described above are related to matched-funded loans. The direct note itself has an annual maturity as prescribed in the GFA.

Note 7 — Members' Equity

A description of the Association's capitalization requirements, protection mechanisms, regulatory capitalization requirements and restrictions, and equities are provided below:

A. Capital Stock and Participation Certificates: In accordance with the Farm Credit Act and the Association's capitalization bylaws, each borrower is required to invest in Class B stock for agricultural loans, or participation certificates in the case of rural home and farm-related business loans, as a condition of borrowing. The initial borrower investment, through either purchase or transfer, must be in an amount equal to \$1 thousand or two percent of the loan amount, whichever is less. The Board of Directors may increase the amount of investment if necessary to meet the Association's capital needs. Loans designated for sale or sold into the Secondary Market on or after April 16, 1996 will have no voting stock or participation certificate purchase requirement if sold within 180 days following the date of designation.

The borrower acquires ownership of the capital stock or participation certificates at the time the loan is made, but usually does not make a cash investment. The aggregate par value is generally added to the principal amount of the related loan obligation. The Association retains a first lien on the stock or participation certificates owned by borrowers. Retirement of such equities will generally be at the lower of par or book value, and repayment of a loan does not automatically result in retirement of the corresponding stock or participation certificates.

B. Regulatory Capitalization Requirements and Restrictions: An FCA regulation empowers it to direct a transfer of funds or equities by one or more System institutions to another System institution under specified circumstances. The Association has not been called upon to initiate any transfers and is not aware of any proposed action under this regulation.

There are currently no prohibitions in place that would prevent the Association from retiring stock, distributing earnings, or paying dividends per the statutory and regulatory restrictions, and the Association has no reason to believe any such restrictions may apply in the future.

Effective January 1, 2017, the regulatory capital requirements for System banks and associations were modified. These regulations ensure that the System's capital requirements are comparable to the Basel III framework and the standardized approach that the federal banking regulatory agencies have adopted. Regulatory ratios include common equity tier 1 (CET1) capital, tier 1 capital, and total capital risk-based ratios. The regulations also include a tier 1 leverage ratio and an unallocated retained earnings (URE) and URE equivalents (UREE) leverage ratio. The permanent capital ratio (PCR) remains in effect.

The ratios are calculated using three-month average daily balances, in accordance with FCA regulations, as follows:

- The CET1 capital ratio is the sum of statutory minimum purchased borrower stock, other required borrower stock held for a minimum of 7 years, allocated equities held for a minimum of 7 years or not subject to revolvment, unallocated retained earnings, and paid-in capital, less certain regulatory required deductions including the amount of investments in other System institutions, divided by average risk-adjusted assets.
- The tier 1 capital ratio is CET1 capital plus non-cumulative perpetual preferred stock, divided by average risk-adjusted assets.
- The total capital ratio is tier 1 capital plus other required borrower stock held for a minimum of 5 years, subordinated debt and limited-life preferred stock greater than 5 years to maturity at issuance subject to certain limitations, and allowance for loan losses and reserve for unfunded commitments under certain limitations less certain investments in other System institutions under the corresponding deduction approach, divided by average risk-adjusted assets.
- The permanent capital ratio is all at-risk borrower stock, any allocated excess stock, unallocated retained earnings, paid-in capital, subordinated debt and preferred stock subject to certain limitations, less certain investments in other System institutions, divided by PCR risk-adjusted assets.
- The tier 1 leverage ratio is tier 1 capital, divided by average total assets less regulatory deductions to tier 1 capital.
- The URE and UREE leverage ratio is unallocated retained earnings, paid-in capital, and allocated surplus not subject to revolvment less certain regulatory required deductions including the amount of allocated investments in other System institutions divided by average total assets less regulatory deductions to tier 1 capital.

The following sets forth the regulatory capital ratios which were effective January 1, 2017:

Ratio	Minimum Requirement	Capital Conservation Buffer*	Minimum Requirement with Capital Conservation Buffer	Capital Ratios as of December 31,		
				2019	2018	2017
Risk-adjusted ratios:						
CET1 Capital	4.5%	1.875%	6.375%	26.62%	26.17%	25.94%
Tier 1 Capital	6.0%	1.875%	7.875%	26.62%	26.17%	25.94%
Total Capital	8.0%	1.875%	9.875%	26.99%	26.52%	26.38%
Permanent Capital	7.0%	0.0%	7.0%	26.71%	26.26%	26.05%
Non-risk-adjusted ratios:						
Tier 1 Leverage	4.0%	1.0%	5.0%	27.90%	27.85%	27.72%
URE and UREE Leverage	1.5%	0.0%	1.5%	27.94%	27.93%	27.85%

* The capital conservation buffers have a 3 year phase-in period and became fully effective January 1, 2020. Risk-adjusted ratio minimums increased 0.625% each year until fully phased in. There was no phase-in period for the tier 1 leverage ratio.

If the capital ratios fall below the minimum regulatory requirements, including the buffer amounts, capital distributions (equity redemptions, dividends, and patronage) and discretionary senior executive bonuses are restricted or prohibited without prior FCA approval.

C. Description of Equities: The Association is authorized to issue or have outstanding Class C Preferred Stock, Classes A, B, and D Common Stock, Participation Certificates and such other classes of equity as may be provided for in amendments to the bylaws in such amounts as may be necessary to conduct the Association’s business. All stock and participation certificates have a par or face value of five dollars (\$5.00) per share.

The Association had the following shares outstanding at December 31, 2019:

Class	Protected	Shares Outstanding	
		Number	Aggregate Par Value
C Common/Voting	No	930,799	\$ 4,654
Participation Certificates/Nonvoting	No	116,767	584
Total Capital Stock and Participation Certificates		1,047,566	\$ 5,238

Protected common stock and participation certificates are retired at par or face value in the normal course of business. At-risk common stock and participation certificates are retired at the sole discretion of the Board at book value not to exceed par or face amounts, provided the minimum capital adequacy standards established by the Board are met.

Retained Earnings

The Association maintains an unallocated retained earnings account and an allocated retained earnings account. The minimum aggregate amount of these two accounts is determined by the Board. At the end of any fiscal year, if the retained earnings accounts otherwise would be less than the minimum amount determined by the Board as necessary to maintain adequate capital reserves to meet the commitments of the Association, the Association shall apply earnings for the year to the unallocated retained earnings account in such amounts as may be determined necessary by the Board. Unallocated retained earnings are

maintained for each borrower to permit liquidation on a patronage basis.

The Association maintains an allocated retained earnings account consisting of earnings held and allocated to borrowers on a patronage basis. In the event of a net loss for any fiscal year, such allocated retained earnings account will be subject to full impairment in the order specified in the bylaws beginning with the most recent allocation.

The Association has a first lien and security interest on all retained earnings account allocations owned by any borrowers, and all distributions thereof, as additional collateral for their indebtedness to the Association. When the debt of a borrower is in default or is in the process of final liquidation by payment or otherwise, the Association, upon approval of the Board, may order any and all retained earnings account allocations owned by such borrower to be applied on the indebtedness.

Allocated equities shall be retired solely at the discretion of the Board; provided, however, that minimum capital standards established by the FCA and the Board are met.

Dividends

The Association may declare noncumulative dividends on its capital stock and participation certificates provided the dividend rate does not exceed 20 percent of the par value of the respective capital stock and participation certificates. Such dividends may be paid solely on Class C Preferred Stock or on all classes of stock and participation certificates.

The rate of dividends paid on Class C Preferred Stock for any fiscal year may not be less than the rate of dividend paid on Classes A, B, and D Common Stock or participation certificates for such year. The rate of dividends on Classes A, B, and D Common Stock and participation certificates shall be at the same rate per share.

Dividends may not be declared if, after recording the liability, the Association would not meet its capital adequacy standards. No dividends were declared by the Association for any of the periods included in these Consolidated Financial Statements.

Patronage Distributions

Prior to the beginning of any fiscal year, the Board, by adoption of a resolution, may obligate the Association to distribute to borrowers on a patronage basis all or any portion of available net earnings for such fiscal year or for that and subsequent fiscal years. Patronage distributions are based on the proportion of the borrower's interest to the amount of interest earned by the Association on its total loans unless another proportionate patronage basis is approved by the Board.

If the Association meets its capital adequacy standards after making the patronage distributions, the patronage distributions may be in cash, authorized stock of the Association, allocations of earnings retained in an allocated members' equity account, or any one or more of such forms of distribution. Patronage distributions of the Association's earnings may be paid on either a qualified or nonqualified basis, or a combination of both, as determined by the Board. A minimum of 20 percent of the total qualified patronage distribution to any borrower for any fiscal year shall always be paid in cash.

Transfer

Class C Preferred, Classes A, B, and D Common Stocks, and Participation Certificates may be transferred to persons or entities eligible to purchase or hold such equities.

Impairment

Any net losses recorded by the Association shall first be applied against unallocated members' equity. To the extent that such losses would exceed unallocated members' equity, such losses would be applied consistent with the Association's bylaws and distributed pro rata to each share and/or unit outstanding in the class, in the following order:

1. Classes A, B, and D Common Stock and Participation Certificates
2. Class C Preferred Stock

Liquidation

In the event of liquidation or dissolution of the Association, any assets of the Association remaining after payment or retirement of all liabilities should be distributed to the holders of the outstanding stock and participation certificates in the following order:

1. Class C Preferred Stock
2. Classes A, B, and D Common Stock and Participation Certificates
3. Holders of allocated retained earnings pro rata, until an amount equal to the total account has been distributed.

D. Accumulated Other Comprehensive Income (AOCI):

	Changes in Accumulated Other Comprehensive income by Component (a)					
	For the Year Ended December 31,					
	2019		2018		2017	
Employee Benefit Plans:						
Balance at beginning of period	\$	(8)	\$	(44)	\$	(14)
Other comprehensive income before reclassifications		(349)		36		(30)
Amounts reclassified from AOCI		-		-		-
Net current period OCI		(349)		36		(30)
Balance at end of period	\$	(357)	\$	(8)	\$	(44)

	Reclassifications Out of Accumulated Other Comprehensive Income (b)						
	For the Year Ended December 31,						
	2019		2018		2017		Income Statement Line Item
Defined Benefit Pension Plans:							
Periodic pension costs	\$	-	\$	-	\$	-	See Note 9.
Amounts reclassified	\$	-	\$	-	\$	-	

(a) Amounts in parentheses indicate debits to AOCI.
 (b) Amounts in parentheses indicate debits to profit/loss.

Note 8 — Fair Value Measurement

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability in an orderly transaction between market participants in the principal or most advantageous market for the asset or liability.

Accounting guidance establishes a hierarchy for disclosure of fair value measurements to maximize the use of observable inputs, that is, inputs that reflect the assumptions market participants would use in pricing an asset or liability based on

market data obtained from sources independent of the reporting entity. The hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. A financial instrument's categorization within the hierarchy tiers is based upon the lowest level of input that is significant to the fair value measurement.

Estimating the fair value of the Association's equity investments in the Bank and other Farm Credit institutions is not practicable because the stock is not traded. The net

investment is a requirement of borrowing from the Bank and is carried at cost.

The classifications within the fair value hierarchy (See Note 2) are as follows:

Level 1

Assets held in trust funds related to deferred compensation plans are classified as Level 1. The trust funds include investments in securities that are actively traded and have quoted net asset value prices that are directly observable in the marketplace. Additional information for the above may be found in the Notes to the Annual Information Statement of the Farm Credit System.

For cash, the carrying value is primarily utilized as a reasonable estimate of fair value.

Level 2

The Association had no Level 2 assets and liabilities measured at fair value on a recurring basis.

Level 3

Because no active market exists for the Association's accruing loans, fair value is estimated by discounting the expected future cash flows using the Association's current interest rates at which similar loans currently would be made to borrowers with similar credit risk. The loan portfolio is segregated into pools of loans with homogeneous characteristics based upon repricing and credit risk. Expected future cash flows and interest rates reflecting appropriate credit risk are separately determined for each individual pool.

Fair values of loans in a nonaccrual status are estimated to be the carrying amount of the loan less specific reserves. Certain loans evaluated for impairment under FASB guidance have fair values based upon the underlying collateral, as the loans were collateral-dependent. Specific reserves were established for these loans when the value of the collateral, less estimated cost to sell, was less than the principal balance of the loan. The fair value measurement process uses independent appraisals and other market-based information, but in many cases it also requires significant input based on management's knowledge of and judgment about current market conditions, specific issues relating to the collateral and other matters.

Notes payable are segregated into pricing pools according to the types and terms of the loans (or other assets) which they fund. Fair value of the notes payable is estimated by discounting the anticipated cash flows of each pricing pool using the current rate that would be charged for additional borrowings. For purposes of this estimate it is assumed the cash flow on the notes is equal to the principal payments on the Association's loan receivables. This assumption implies that earnings on the Association's interest margin are used to fund operating expenses and capital expenditures.

Other property owned is classified as a Level 3 asset. The fair value is generally determined using formal appraisals of each individual property. These assets are held for sale. Costs to sell represent transaction costs and are not included as a component of the fair value of other property owned. Other property owned consists of real and personal property acquired

through foreclosure or deed in lieu of foreclosure and is carried as an asset held for sale, which is generally not its highest and best use. These properties are part of the Association's credit risk mitigation efforts, not its ongoing business. In addition, FCA regulations require that these types of property be disposed of within a reasonable period of time.

For commitments to extend credit, the estimated market value of off-balance-sheet commitments is minimal since the committed rate approximates current rates offered for commitments with similar rate and maturity characteristics; therefore, the related credit risk is not significant.

There were no Level 3 assets and liabilities measured at fair value on a recurring basis for the periods presented. The Association had no transfers of assets or liabilities into or out of Level 1 or Level 2 during the periods presented.

Fair values are estimated at each period end date for assets and liabilities measured at fair value on a recurring basis. Other Financial Instruments are not measured at fair value in the statement of financial position, but their fair values are estimated as of each period end date. The following tables summarize the carrying amounts of these assets and liabilities at period end, and their related fair values.

December 31, 2019						
	Total Carrying Amount	Level 1	Level 2	Level 3	Total Fair Value	
Recurring Measurements

Uncertainty in Measurements of Fair Value

Discounted cash flow or similar modeling techniques are generally used to determine the recurring fair value measurements for Level 3 assets and liabilities. Use of these techniques requires determination of relevant inputs and assumptions, some of which represent significant unobservable inputs as indicated in the tables that follow. Accordingly, changes in these unobservable inputs may have a significant impact on fair value.

Certain of these unobservable inputs will (in isolation) have a directionally consistent impact on the fair value of the instrument for a given change in that input. Alternatively, the fair value of the instrument may move in an opposite direction for a given change in another input. Where multiple inputs are used within the valuation technique of an asset or liability, a change in one input in a certain direction may be offset by an opposite change in another input having a potentially muted impact to the overall fair value of that particular instrument. Additionally, a change in one unobservable input may result in a change to another unobservable input (that is, changes in

certain inputs are interrelated with one another), which may counteract or magnify the fair value impact.

Inputs to Valuation Techniques

Management determines the Association’s valuation policies and procedures. The Bank performs the majority of the Association’s valuations, and its valuation processes are calibrated annually by an independent consultant. The fair value measurements are analyzed on a quarterly basis. For other valuations, documentation is obtained for third party information, such as pricing, and periodically evaluated alongside internal information and pricing that is available.

Quoted market prices are generally not available for the instruments presented below. Accordingly fair values are based on judgments regarding anticipated cash flows, future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates involve uncertainties and matters of judgment, and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimate.

Quantitative Information about Recurring and Nonrecurring Level 3 Fair Value Measurements

	Fair Value	Valuation Technique(s)	Unobservable Input	Range
Impaired loans and other property owned	\$ 734	Appraisal	Income and expense Comparable sales Replacement costs Comparability adjustments	* * * *

* Ranges for this type of input are not useful because each collateral property is unique.

Information about Other Financial Instrument Fair Value Measurements

	Valuation Technique(s)	Input
Cash	Carrying value	Par/principal and appropriate interest yield
Loans	Discounted cash flow	Prepayment forecasts Probability of default Loss severity
Notes payable to AgFirst Farm Credit Bank	Discounted cash flow	Prepayment forecasts Probability of default Loss severity

Note 9 — Employee Benefit Plans

The Association participates in three District sponsored benefit plans. These plans include a multiemployer defined benefit pension plan, the AgFirst Farm Credit Retirement Plan, which is a final average pay plan (FAP Plan). In addition, the Association participates in a multiemployer defined benefit other postretirement benefits plan (OPEB Plan), the Farm Credit Benefits Alliance Retiree and Disabled Medical and Dental Plan, and a defined contribution 401(k) plan. The risks of participating in these multiemployer plans are different from single employer plans in the following aspects:

1. Assets contributed to multiemployer plans by one employer may be used to provide benefits to employees of other participating employers.
2. If a participating employer stops contributing to the plan, the unfunded obligations of the plan may be borne by the remaining participating employers.
3. If the Association chooses to stop participating in some of its multiemployer plans, the Association may be required to contribute to eliminate the underfunded status of the plan.

The District's multiemployer plans are not subject to ERISA and no Form 5500 is required. As such, the following information is neither available for nor applicable to the plans:

1. The Employer Identification Number (EIN) and three-digit Pension Plan Number
2. The most recent Pension Protection Act (PPA) zone status. Among other factors, plans in the red zone are generally less than 65 percent funded, plans in the yellow zone are less than 80 percent funded, and plans in the green zone are at least 80 percent funded.
3. The "FIP/RP Status" indicating whether a financial improvement plan (FIP) or a rehabilitation plan (RP) is either pending or has been implemented.
4. The expiration date(s) of collective-bargaining agreement(s).

The FAP Plan covers employees hired prior to January 1, 2003 and includes other District employees that are not employees of the Association. It is accounted for as a multiemployer plan. The related net benefit plan obligations are not included in the Association's Balance Sheets but are included in the Combined Balance Sheets for the AgFirst District. FAP Plan expenses included in employee benefit costs on the Association's Statements of Income were \$1,612 for 2019, \$1,944 for 2018, and \$1,572 for 2017. At December 31, 2019, 2018, and 2017, the total liability balance for the FAP Plan presented in the District Combined Balance Sheets was \$129,713, \$94,491, and \$139,104, respectively. The FAP Plan was 87.55 percent, 89.56 percent, and 86.41 percent funded to the projected benefit obligation as of December 31, 2019, 2018, and 2017, respectively.

In addition to providing pension benefits, the Association provides certain medical and dental benefits for eligible retired employees through the OPEB Plan. Substantially all of the Association employees may become eligible for the benefits if they reach early retirement age while working for the Association. Early retirement age is defined as a minimum of age 55 and 10 years of service. Employees hired after December 31, 2002, and employees who separate from

service between age 50 and age 55, are required to pay the full cost of their retiree health insurance coverage. Employees who retire subsequent to December 1, 2007 are no longer provided retiree life insurance benefits. The OPEB Plan includes other Farm Credit System employees that are not employees of the Association or District and is accounted for as a multiemployer plan. The related net benefit plan obligations are not included in the Association's Balance Sheets but are included in the Combined Statement of Condition for the Farm Credit System. The OPEB Plan is unfunded with expenses paid as incurred. Postretirement benefits other than pensions included in employee benefit costs on the Association's Statements of Income were \$212 for 2019, \$252 for 2018, and \$258 for 2017. At December 31, 2019, the total AgFirst District liability balance for the OPEB Plan presented in the Farm Credit System Combined Statement of Condition was \$209,531.

During 2017, the method of recording expenses at participating District entities for the FAP and OPEB Plans was modified. Prior to 2017, expense was recorded based on allocations of actuarially-determined costs and any differences between recorded expense and actual contributions were recorded in Other Assets or Other Liabilities on the Consolidated Balance Sheets. For 2017 and future years, participating entities will record employee benefit costs based on the actual contributions to the Plans. This change caused the Association to modify its accounting estimates recorded in Other Assets and Other Liabilities since the assets and liabilities do not impact future contributions to the Plans. The change in estimate resulted in the reduction of Other Liabilities by \$4,102 on the Association's Balance Sheets, and a total reduction of noninterest expenses on the Association's Statements of Income of \$4,102 during 2017.

The Association also participates in a defined contribution Farm Credit Benefits Alliance (FCBA) 401(k) Plan, which qualifies as a 401(k) plan as defined by the Internal Revenue Code. For employees hired on or prior to December 31, 2002, the Association contributes \$0.50 for each \$1.00 of the employee's first 6.00 percent of contribution (based on total compensation) up to the maximum employer contribution of 3.00 percent of total compensation. For employees hired on or after January 1, 2003, the Association contributes \$1.00 for each \$1.00 of the employee's first 6.00 percent of contribution up to the maximum employer contribution of 6.00 percent of total compensation. Employee deferrals are not to exceed the maximum deferral as determined and adjusted by the Internal Revenue Service. The 401(k) Plan costs are expensed as funded. Employer contributions to this plan included in salaries and employee benefit costs were \$419, \$380, and \$356 for the years ended December 31, 2019, 2018, and 2017, respectively. Beginning in 2015, contributions include an additional 3.00 percent of eligible compensation for employees hired after December 31, 2002.

FASB guidance further requires the determination of the fair value of plan assets and recognition of actuarial gains and losses, prior service costs or credits, and transition assets or obligations as a component of AOCI. Under the guidance, these amounts are subsequently recognized as components of net periodic benefit costs over time. For 2019, 2018, and 2017, \$(349), \$36, and \$(30), respectively, have been recognized as a net debit, a net credit, and a net debit to AOCI to reflect these elements.

Additional information for the above may be found in the Notes to the Annual Information Statement of the Farm Credit System.

The supplemental retirement plan is unfunded and had a projected benefit obligation of \$816 and a net under-funded status of \$816 at December 31, 2019. Expenses included in noninterest expenses were \$20, \$19, and \$21 for 2019, 2018, and 2017, respectively. Assumptions used to determine the projected benefit obligation as of December 31, 2019 included a discount rate of 3.30 percent.

Note 10 — Related Party Transactions

In the ordinary course of business, the Association enters into loan transactions with officers and directors of the Association, their immediate families and other organizations with which such persons may be associated. Such loans are subject to special approval requirements contained in the FCA regulations and are made on the same terms, including interest rates, amortization schedule, and collateral, as those prevailing at the time for comparable transactions with unaffiliated borrowers.

Total loans to such persons at December 31, 2019 amounted to \$15,026. During 2019, \$10,683 of new loans were made and repayments totaled \$11,458. Additionally, \$948 was added and none were removed due to changes in directors throughout the year. In the opinion of management, none of these loans outstanding at December 31, 2019 involved more than a normal risk of collectibility.

Note 11 — Commitments and Contingencies

From time to time, legal actions are pending against the Association in which claims for money damages are asserted. On at least a quarterly basis, the Association assesses its liabilities and contingencies in connection with outstanding legal proceedings utilizing the latest information available. While the outcome of legal proceedings is inherently uncertain, on the basis of information presently available, management, after consultation with legal counsel, is of the opinion that the ultimate liability, if any, from these actions, would not be material in relation to the financial position of the Association. Because it is not probable that the Association will incur a loss or the loss is not estimable, no liability has been recorded for any claims that may be pending.

In the normal course of business, the Association may participate in financial instruments with off-balance-sheet risk to satisfy the financing needs of its borrowers. These financial instruments may include commitments to extend credit or letters of credit.

The instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the financial statements. Commitments to extend credit are agreements to lend to a borrower as long as there is not a violation of any condition established in the contract. Commercial letters of credit are agreements to pay a beneficiary under conditions specified in the letter of credit. Commitments and letters of credit generally have fixed expiration dates or other termination clauses and may require payment of a fee.

Since many of these commitments are expected to expire without being drawn upon, the total commitments do not necessarily represent future cash requirements. However, these credit-related financial instruments have off-balance-sheet credit risk because their amounts are not reflected on the Consolidated Balance Sheets until funded or drawn upon. The credit risk associated with issuing commitments and letters of credit is substantially the same as that involved in extending loans to borrowers and management applies the same credit policies to these commitments. Upon fully funding a commitment, the credit risk amounts are equal to the contract amounts, assuming that borrowers fail completely to meet their obligations and the collateral or other security is of no value. The amount of collateral obtained, if deemed necessary upon extension of credit, is based on management’s credit evaluation of the borrower. At December 31, 2019, \$126,947 of commitments to extend credit and no commercial letters of credit were outstanding. A related reserve for unfunded commitments of \$212 was included in Other Liabilities in the Consolidated Balance Sheets.

The Association also participates in standby letters of credit to satisfy the financing needs of its borrowers. These letters of credit are irrevocable agreements to guarantee payments of specified financial obligations. At December 31, 2019, standby letters of credit outstanding totaled \$527 with expiration dates ranging from January 1, 2020 to December 12, 2023. The maximum potential amount of future payments that may be required under these guarantees was \$527.

Note 12 — Income Taxes

The provision (benefit) for income taxes follows:

	Year Ended December 31,		
	2019	2018	2017
Current:			
Federal	\$ 7	\$ 9	\$ 7
State	1	3	3
	<u>8</u>	<u>12</u>	<u>10</u>
Deferred:			
Federal	—	—	—
State	—	—	—
Total provision (benefit) for income taxes	<u>\$ 8</u>	<u>\$ 12</u>	<u>\$ 10</u>

The provision (benefit) for income tax differs from the amount of income tax determined by applying the applicable U.S. statutory federal income tax rate to pretax income as follows:

	December 31,		
	2019	2018	2017
Federal tax at statutory rate	\$ 3,506	\$ 3,858	\$ 6,810
State tax, net	2	2	1
Patronage distributions	(3,041)	(3,384)	(3,866)
Tax-exempt FLCA earnings	(431)	(479)	(2,875)
Changes in tax law/rates			139
Change in deferred tax asset valuation allowance	(33)	19	(201)
Other	5	(4)	2
Provision (benefit) for income taxes	<u>\$ 8</u>	<u>\$ 12</u>	<u>\$ 10</u>

In late December 2017, federal tax legislation was enacted which, among other things, lowered the federal corporate tax rate from 35% to 21% beginning on January 1, 2018. The

change to the lower corporate tax rate led to an insignificant remeasurement of the deferred tax liabilities and deferred tax assets in 2017, the period of enactment. Deferred tax assets and liabilities are comprised of the following at:

	December 31,		
	2019	2018	2017
Deferred income tax assets:			
Allowance for loan losses	\$ 338	\$ 330	\$ 311
Other property owned writedown	-	-	-
Nonaccrual loan interest	106	92	76
Fixed assets (asset)	-	6	11
Gross deferred tax assets	444	428	398
Less: valuation allowance	(258)	(291)	(272)
Gross deferred tax assets, net of valuation allowance	186	137	126
Deferred income tax liabilities:			
Depreciation	-	-	-
Fixed assets	(56)	-	-
Loan origination fees	(130)	(137)	(126)
Gross deferred tax liability	(186)	(137)	(126)
Net deferred tax asset (liability)	\$ -	\$ -	\$ -

At December 31, 2019, deferred income taxes have not been provided by the Association on approximately \$0.9 million of patronage refunds received from the Bank prior to January 1, 1993. Such refunds, distributed in the form of stock, are subject to tax only upon conversion to cash. The tax liability related to future conversions is not expected to be material.

The Association recorded a valuation allowance of \$258, \$291, and \$272 as of December 31, 2019, 2018 and 2017, respectively. The Association will continue to evaluate the realizability of these deferred tax assets and adjust the valuation allowance accordingly.

There were no uncertain tax positions identified related to the current year and the Association has no unrecognized tax benefits at December 31, 2019 for which liabilities have been established. The Association recognizes interest and penalties, if any, related to unrecognized tax benefits as a component of income tax expense. The tax years that remain open for federal and major state income tax jurisdictions are 2016 and forward.

Note 13 — Additional Financial Information

Quarterly Financial Information (Unaudited)

	2019				
	First	Second	Third	Fourth	Total
